

As we are finishing out another week of AMI or virtual learning, I wanted to reach out to share some resources McGraw Hill has put together at no cost for parents or districts. Below I have made a quick list of the resources.

- **Free 2 month licenses to ALEKS** – parents can sign up for this on their own

<https://www.mheducation.com/prek-12/explore/aleks-parent-offer.html>

- ALEKS is an adaptive, online math program for grades 3–12 that identifies what each child knows and doesn't know and delivers a personalized learning path.

- **Free AP digital test prep – email me for this information**

- **Community support for learning at home**

<https://www.mheducation.com/prek-12/explore/community-support.html>

- Free lessons for different subject areas, parent resources, and resources for fun

- **Support if using any of McGraw Hill programs** including virtual teaching, resources available, and digital support
