Process:

- We stayed after school with Mrs. Schmelz. She is a third grade teacher at our school who likes to take pictures. She showed us some pictures that she has taken. Then, she talked to us about taking pictures with a digital camera.
- She talked to us about taking good pictures. She told us to think about depth, focal points and the angle of photos.
- We used an STLP digital camera. We walked around the school and took pictures. Then, we went outside and took more pictures. My picture was taken outside.
- Ms. Harshfield helped upload the pictures so we could look at them.
