Remote learning is defined as internet-based learning that delivers content and enables communication between the educator and students. It is where the student and the educator are not physically present in a traditional classroom environment; therefore, students have access to appropriate educational materials and interact with their teachers daily online. Information is relayed through a delivery platform (Google and Seesaw) where educators and students can engage through discussion boards, video conferencing, online assessments, etc. Remote learning doesn't always mean a student is connected to the internet in order to learn.

Delivery Platform

1. Google suite (grades 3-12) - Google Classroom, Google docs, Google sites, etc.
2. Seesaw (PK-2) is the Lakeview platform.
3. Telecommunications (grades PK-12).

Types of access to remote learning

1. Consistent, reliable access to internet at home
2. Inconsistent, unreliable access to internet at home
3. Access to internet only by community hotspots/parking lot wifi
4. No access to internet

School Community Access to Internet

The District is planning to use bus hotspots that will be parked both in Page and throughout the surrounding communities. More information, including maps to show access points, is under development.

Distribution of learning materials:

- August 3-5: 7:30am-9:00am; 11:00am-1:00pm; 5:00pm-6:30pm at all school sites

- Lake View Primary: curbside pickup at B door (North Navajo Drive)
- Parents and students must remain in their vehicles during device distribution.
 - If you have questions, you will be asked to park and a staff member will assist you one-on-one.

Scenario 1: On-site Learning (in classrooms)

Considerations through:

we still need to think

On-site learning	Remote learning
Clear cleaning and health protocols practiced by staff and students	-How do we keep students on pace with grade level curriculum that don't have the internet? -How do we take attendance for students that don't have the internet? -How do we capture demonstrations of learning from students that don't have the internet?
