PREPARTICIPATION PHYSICAL EVALUATION

PHYSICAL EXAMINATION FORM Name Date of birth _ **PHYSICIAN REMINDERS** 1. Consider additional questions on more sensitive issues • Do you feel stressed out or under a lot of pressure? Do you ever feel sad, hopeless, depressed, or anxious? . Do you feel safe at your home or residence? · Have you ever tried cigarettes, chewing tobacco, snuff, or dip? • During the past 30 days, did you use chewing tobacco, snuff, or dip? . Do you drink alcohol or use any other drugs? Have you ever taken anabolic steroids or used any other performance supplement? · Have you ever taken any supplements to help you gain or lose weight or improve your performance? Do you wear a seat belt, use a helmet, and use condoms? 2. Consider reviewing questions on cardiovascular symptoms (questions 5-14). **EXAMINATION** Height Weight ☐ Male ☐ Female ВP Corrected □ Y □ N Pulse Vision R 20/ 1 20/ NORMAL ABNORMAL FINDINGS **MEDICAL** Appearance Marfan stigmata (kyphoscoliosis, high-arched palate, pectus excavatum, arachnodactyly, arm span > height, hyperlaxity, myopia, MVP, aortic insufficiency) Eyes/ears/nose/throat · Pupils equal Hearing Lymph nodes Heart^a • Murmurs (auscultation standing, supine, +/- Valsalva) · Location of point of maximal impulse (PMI) Pulses • Simultaneous femoral and radial pulses Lungs Abdomen Genitourinary (males only)^b • HSV, lesions suggestive of MRSA, tinea corporis Neurologic of MUSCULOSKELETAL Neck Back Shoulder/arm Elbow/forearm Wrist/hand/fingers Hip/thigh Knee Leg/ankle Foot/toes **Functional** · Duck-walk, single leg hop ^aConsider ECG, echocardiogram, and referral to cardiology for abnormal cardiac history or exam. Consider GU exam if in private setting. Having third party present is recommended. Consider cognitive evaluation or baseline neuropsychiatric testing if a history of significant concussion. □ Not cleared □ Pending further evaluation □ For any sports

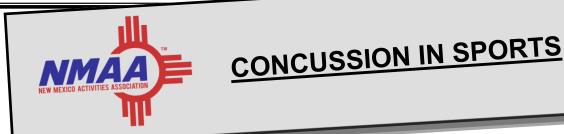

☐ Cleared for all sports without restriction ☐ Cleared for all sports without restriction with recommendations for further evaluation or treatment for

□ For certain sports

Recommendations

I have examined the above-named student and completed the preparticipation physical evaluation. The athlete does not present apparent clinical contraindications to practice and participate in the sport(s) as outlined above. A copy of the physical exam is on record in my office and can be made available to the school at the request of the parents. If conditions arise after the athlete has been cleared for participation, the physician may rescind the clearance until the problem is resolved and the potential consequences are completely explained to the athlete (and parents/guardians).

A Fact Sheet for Athletes and Parents

WHAT IS A CONCUSSION?

A concussion is an injury that changes how the cells in the brain normally work. A concussion is caused by a blow to the head or body that causes the brain to move rapidly inside the skull. Even a "ding," "getting your bell rung," or what seems to be a mild bump or blow to the head can be serious. Concussions can also result from a fall or from players colliding with each other or with obstacles, such as a goalpost.

WHAT ARE THE SIGNS AND SYMPTOMS OF A CONCUSSION?

Observed by the Athlete

Headache or "pressure" in head

- Nausea or vomiting
- Balance problems or dizziness
- Double or blurry vision
- Bothered by light
- Bothered by noise
- Feeling sluggish, hazy, foggy, or groggy
- Difficulty paying attention
- Memory problems
- Confusion
- Does not "feel right"

Observed by the Parent / Guardian

- Is confused about assignment or position
- Forgets an instruction
- Is unsure of game, score, or opponent
- Moves clumsily
- Answers questions slowly
- Loses consciousness (even briefly)
- Shows behavior or personality changes
- Can't recall events after hit or fall
- Appears dazed or stunned

WHAT TO DO IF SIGNS/SYMPTOMS OF A CONCUSSION ARE

Athlete

- TELL YOUR COACH IMMEDIATELY!
- Inform Parents
- Seek Medical Attention
- Give Yourself Time to Recover

Parent / Guardian

- Seek Medical Attention
- Keep Your Child Out of Play
- Discuss Plan to Return with the Coach

It's better to miss one game than the whole season.

Give yourself time to get better. If you have had a concussion, your brain needs time to heal. While your brain is still healing, you are much more likely to have a second concussion. Second or later concussions can cause damage to your brain. It is important to rest until you get approval from a doctor or health care professional to return to play.

RETURN TO PLAY GUIDELINES UNDER SB38

- 1. Remove immediately from activity when signs/symptoms are present.
- 2. Must not return to full activity prior to a minimum of 240 hours (10 days).
- 3. Release from medical professional required for return.
- 4. Follow school district's return to play guidelines.
- 5. Coaches continue to monitor for signs/symptoms once athletes return to activity.

Students need cognitive rest from the classroom, texting, cell phones, etc.

SIGNATURES

By signing below, parent/guardian and athlete acknowledge the following:

- Both have received and reviewed the attached NMAA's Concussion in Sports Fact Sheet for Athletes and Parents.
- Both understand the risks of brain injuries associated with participation in school athletic activity, and are aware of the State of the New Mexico's Senate Bill 38; Concussion Law.
- Athlete has received brain injury training pursuant to Senate Bill 38.
