

ROCKY HILL PUBLIC SCHOOLS  
CHRONIC HEALTH CONDITIONS MANAGEMENT PLAN

The Rocky Hill Public School Board of Education recognizes the importance of providing safe and effective health services for students with chronic medical conditions, including but not limited to potentially life threatening allergies (i.e. food, insect stings, medications, chemicals).

The Rocky Hill Public School District shall undertake the following actions to promote safe and effective health care for students.

**1. Process for the Identification of Students with significant Chronic Health Conditions**

- Completion of Rocky Hill Public Schools Health History Questionnaire by all parents/guardians of new registrations and Pre-Kindergarten Interview for all incoming kindergarten students.
- Annual completion Student Information Card by all parents/guardians.
- Review of health records submitted by parent/guardian and health care provider by school nurse.
- Interview of parent/guardian by school nurse.

**2. Process for Annual Development of Individualized Health Care Plan**

- The school nurses, using the nursing process, will assess each student with a significant chronic health condition and in collaboration with the parent/guardian, health care provider, administrator, classroom teachers and student (if appropriate), develop an Individualized Health Care Plan/ Individualized Emergency Care Plan consistent with their needs. The plan(s) will be reviewed annually and revised as needed.

**3. Administration of Medications**

- Medications will be administered following Rocky Hill BOE policy and procedures regarding the Administration of Medication by School Personnel in compliance with CGS, Section Sections 10-212a and Sections
- 10-212a-1 through 10-212a-7 of the Regulations of the Connecticut State Agencies.
- RHPS procedure also includes standing orders from the School Medical Advisor for the school nurse or licensed R.N. substituting for the school nurse to administer epinephrine to students who are not known to have a life threatening allergy, do not have their own medication and have their first anaphylactic reaction in school.
