PROGRAM DESCRIPTION:

The Network Systems Administration program is the advanced Program to the Network Support Services program. This program provides students with advance network, server and security techniques to analyze, test, troubleshoot and evaluate existing network systems, such as local area networks (LAN), wide area networks (WAN), and Internet systems or a segment of a network system. Students completing this program are prepared for jobs as Computer Support Assistants, Network Support Technicians, Systems Administrators, Systems Engineers, Wireless Networks Administrators and Data Communications Analyst.

OCCUPATION DESCRIPTION:

Advanced network, server and security techniques to analyze, test, troubleshoot, and evaluate existing network systems, such as local area network (LAN), wide area network (WAN), and Internet systems or a segment of a network system. Perform network maintenance to ensure networks operate correctly with minimal interruption.
