- Shape hub-circle
- School supplies trace and color
- Apple life cycle

Dear Pre-K Family,

Welcome to the KidCrafters Learning at Home program.

This package contains a week of work-at-home assignments. Each day includes 6 pages of math, literacy, science, and other basic skills worksheets.

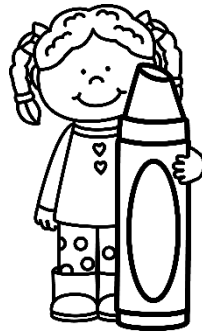

These activities are designed as a review and extra practice for your child. Please also continue to read with him or her each day.

Other activities to extend learning:

- **Put your child's counting ability to work. In preparation for meals, let him or her count out utensils and plates for the table, dinner napkins, pieces of cake, or any other quantity.**
- **Bingo, dominoes, toy telephones, card games, board games, calendars and clocks with large numbers all can help familiarize your child with the world of numbers.**
- **Stimulate your child to make use of all senses in discovering the surrounding world. Encourage curiosity about the feel of textures and materials, characteristic smells, sounds, tastes, weight and sizes of things.**
- **Keep your child supplied with sheets of paper, crayons, paints, and other art supplies. Provide work space for the child and encourage the creation of works of art.**
- **Encourage the habit of vigorous daily activity. Active play builds strong muscles, which are basic to good health and posture. Join your child in active games and stress good sportsmanship.**
