

POSSIBLE WORK SITES

These are the possible job sites available for the Work Based Learning Program. When these sites fit into rotation, we will have the option of placing students at these area businesses. We want the students to experience a variety of job sites but cannot guarantee which sites students will be able to experience. Placements will be based on the needs of the employer, availability of the job coaches, the students' schedules and abilities. Students must have appropriate hygiene and dress and display behaviors acceptable for a work environment to participate in the Work Based Learning Program. (If you have any objection to your student being placed at any of these job sites, please make this known.)

Huron Intermediate School District: Main Office (shred papers or general cleaning)
