

## Southern Local Elementary School

The Safety Guide For Children is a great activity that our elementary school students and parents can use at home. This guide includes a number of safety related activities that will help them to make good decisions and choices that will promote a safe and healthy life style.

The activities that are found in the guide will also help our younger students improve their letter and word recognition skills and hand eye coordination skills. Students and parents can print the guide and choose the activities that are age appropriate. If a printer is not available, students and parents can still use the guide. Parents can guide their child in placing their answers on a separate paper. The activities found in the safety guide also give parents an opportunity to work with their child.

If you have questions please feel free to contact me at your convenience. You can reach me by clicking on my e-mail address that is found directly below my name and telephone number on the Southern Local Elementary School Guidance Page.
