

Accessing Testing Apps on Chromebooks

Objective: This guide will walk you through how to access the testing apps in kiosk mode.

1. Make sure the Chromebook is powered on.
2. When it comes to the sign-in screen, students do **not** need to sign in. The apps run in kiosk-mode which is the equivalent to lockdown browser mode.
3. Click **Apps** in the bottom left corner. You will see 4 apps. The only two that will be used are:
 - Questar
 - TestNav

4. The student should click on the apps required for the test they are taking. Once the student clicks on the correct testing application, the program will load and student will be able to login to access their test.
 - a. **Note:** For TestNav the main page will load and switch to a page where students must select which state they are testing in. Make sure they choose **Mississippi** and then the login page will appear. Please reference the figures below for TestNav and Questar login pages.
