Using the free JLG Digital Desktop version

How-to

1. Click the school-level book stream of your choice from above: [Elementary](#), [Middle School](#), [High School](#).
2. **Ignore the Personal Account Sign-In box at the top of the page**—just scroll down to the books and get started. You can even click the “X” in the top right corner of the sign-in box so that it goes away.
3. **Simply click on a book to go to its page, then click the “Read” or “Play” button** to begin reading/listening. Audiobooks are designated with a headphone icon on the lower right corner of the book cover; ebooks are designated with a tablet icon on the lower right corner.
4. If an audiobook fails to play, check your browser. Audiobooks will **not** play in Internet Explorer or Microsoft Edge.

More tips

- All books in the streams are multi-user, meaning an **unlimited number of readers can access them** at the same time.
- A selection of titles will expire at the end of each month, so **watch for the “Leaving Soon” banners to appear on the cover art**. But, don’t worry—new titles will automatically be added to the streams at that time, too!
- The Search feature will bring up titles that are ***not available*** to be read. These titles are not currently in the streams and cannot be accessed. Only books with the “Read” or “Play” buttons are the books available to read.

EDUCATORS: If you do not want your students to have access to all three school-level streams using the buttons on this page, send your students instead to jlg.ipublishcentral.com and have them log in using the usernames and passwords below:

4. **Tap on a title to open the book.** Doing this will also download the title for offline reading, so you will still be able to read the book through the app when not connected to the internet.

5. Simply **swipe left and right on your screen** to navigate through the book. You can also click on the Settings/gear in the top right corner of the screen and change to "Continuous" to scroll up and down through the book.
