

Join the Auburn University College of Education for our

STEM SUMMER CAMP

Rising 2nd – 5th graders

June 21–June 25 | Monday–Friday via Zoom

June 28–July 2 | Monday–Friday via Zoom

Registration fee \$10 | Tuition \$35 per week

We are going to be having a great time as we learn about structures, protecting our Earth, and force and motion during our virtual STEM enriched summer camp.

STEM is the interdisciplinary and applied approach of science, technology, engineering, and math within a curriculum-based framework which engages students in authentic, meaningful learning environments. Literacy, language arts, and social science skills and strategies will be integrated into this framework to address the holistic world in which we live. Students will have a blast as they conduct experiments, explore their creativity, and challenge their critical thinking skills.
