Two-Factor Authentication

Escape’s Employee Online Portal includes an additional layer of security called Two-Factor Authentication (2FA). This includes sending a confirmation key to either a cell phone (as a text message) or to an email address when you sign in to the Portal from a new device or browser.

During sign-in you can choose where the confirmation key will be sent from a drop-down list. This information is from your employee record in Escape Online 5. If you choose a cell phone, you will need to select the carrier.

A confirmation key will be sent to your chosen delivery method.

You have up to 5 minutes to receive and enter the confirmation key.

If you are using your own device (not a public device), you may choose to have Employee Online Portal remember the device and you will not be required to re-authenticate each time you log in. Re-authentication will be required every 90 days or if you delete your browser history.

If you need further assistance, please contact at:

and include a brief description of the problem or issue you are having.
