Digital Literacy and Citizenship Classroom Curriculum

Educate Families: A Home-to-School Program

Common Sense Media believes in strong partnerships between home and school. That's why we've designed a FREE program to help parents and caregivers navigate and discuss the impact of digital media on kids' social, emotional, and intellectual development. Using resources based on our **K-12 Digital Literacy and Citizenship Curriculum**, educators and parents, together, can empower young people to harness the power of the Internet and digital technology for learning and life -- both in the classroom and at home.

Digital footprint

One of the great things about being online is the ability to share videos and photos with your friends and seeing their response. Everything you post online combines to make your digital footprint. Remember that what you share with your friends may also be viewed by people you don't know. And once it's online, it could be there forever. So think before you post.

You can manage your digital footprint by:

- **Keeping your personal details private.** Use a nickname instead of your real name and always ask your parents before giving out your name, address or phone number online.
- **Not sharing** your username or password with anyone.
