

## Student Daily Screening Information

Conducting regular screenings for symptoms and ongoing self-monitoring throughout the school day can help reduce exposure to COVID-19. Each day, when your child arrives at school, school staff will conduct a symptoms screening. This screening will include:

- Conducting a temperature check utilizing a touchless thermometer.
- Screening for symptoms by asking the following questions:
  - Since you were last at school, have you had the any of these symptoms:
    - Fever
    - Chills
    - Shortness of breath or difficulty breathing
    - New cough
    - New loss of taste or smell
    - Sore Throat
    - Diarrhea and/or vomiting
  - Since you were last at school, have you been diagnosed with COVID-19?
  - Have you had close contact (within 6 feet for at least 15 minutes) in the last 14 days with someone diagnosed with COVID-19 or has any health department, health care provider, and/or school administrator been in contact with you and advised you to quarantine?

A student with a temperature of 100.4 degrees or higher and/or an answer of “yes” to one or more of the symptom screening questions will be sent home immediately. We ask that students self-monitor for symptoms throughout the day. If a student develops symptoms, the student should notify a staff member immediately.
