Complete these steps.

_____ Read "The Rainbow Pilgrimage" and complete the writing prompt.

_____ Complete the Math Learning Review Questions #1-13

_____ Complete the Science review questions #1-26

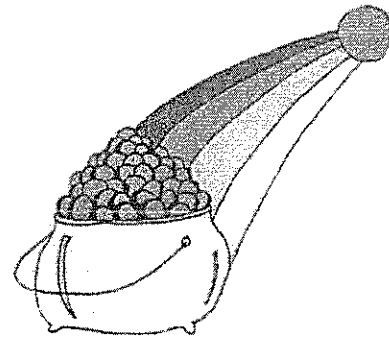

_____ Read independently for 20 minutes with a book of your choice.

_____ Turn in Writing Prompt, Math Review and Science on notebook paper when you return on Tuesday.

adapted from "The Rainbow Pilgrimage"

by Sara J. Lippincott

- 1 One summer afternoon, when I was younger, I was standing at an eastern window, looking at a beautiful rainbow. It was bending from the sky and seemed to be losing itself in a thick, swampy wood about a quarter of a mile distant.
- 2 It happened that no one was in the room with me then but my brother Rufus. He was just recovering from a severe illness. He was sitting, propped up with pillows, in an easy-chair, looking out, with me, at the rainbow.
- 3 "See, brother," I said, "it drops right down among the cedars, where we go in the spring to find wintergreens!"
- 4 "Do you know, Gracie," said my brother, with a very serious face, "that if you should go to the end of the rainbow, you would find there purses filled with money, and great pots of gold and silver?"
- 5 "Is it truly so?" I asked.
- 6 "Truly so," answered my brother, with a smile. Now, I was a simple-hearted child who believed everything that I was told. So, without another word, I darted out of the door, and set forth toward the wood. My brother called after me as loudly as he was able. I did not *heed* him.
- 7 I cared nothing for the wet grass, which was sadly *drabbling* my clean dress. On and on I ran; I was so sure that I knew just where that rainbow ended. I remember how glad and proud I was in my thoughts, and what fine presents I promised to all my friends out of my great riches.
- 8 So almost before I knew it, I had reached the cedar grove, and the end of the rainbow was not there! But I saw it shining down among the trees a little farther off. On and on I struggled, through the thick bushes and over logs, till I came within the sound of a stream which ran through the swamp. Then I thought, "What if the rainbow should come down right in the middle of that deep, muddy brook!"
- 9 I was worried about my heavy pots of gold and silver, and my purses of money. How should I ever find them there? And what a time I should have getting them out! I reached the bank of the stream. The end was not there. But I could see it a little way off on the other side. I crossed the creek on a fallen tree, and still ran on, though my limbs seemed to give way, and my side ached with *fatigue*.
- 10 The woods grew thicker and darker, the ground more wet and swampy. I found that it was rather hard traveling in a journey after riches. Suddenly I met in my way a large porcupine, who made himself still larger when he saw me. Fearing that he would shoot his sharp quills at me, I ran from him as fast as my tired feet would carry me.

heed—listen to; pay attention to
drabbling—making wet and dirty
fatigue—being overly tired; weariness

11 In my fright and hurry I forgot to keep my eye on the rainbow, as I had done before. When, at last, I remembered and looked for it, it was nowhere in sight! It had quite faded away. When I saw that it was gone, I burst into tears. I had lost all my treasures and had nothing to show for my pilgrimage but muddy feet and a wet and torn dress. So I set out for home.

12 But I soon found that my troubles had only begun; I could not find my way. I crawled under some bushes, by the side of a large log, and lay perfectly still.

13 At last I heard my own name called, but I did not answer. Then came a voice near me that sounded like that of my *eldest* brother. He lived away from home, and I had not seen him for many months. But, I dared not believe that the voice was his.

14 Soon someone sprang up on the log by which I lay, and stood there calling. I could not see his face. I still kept quiet, till I heard shouted over me a pet name, which this brother had given me. It was the funniest name in the world, so I sprang up, and caught my brother about the ankles. He hoisted me on to his shoulder, called my other brothers, who were hunting in different directions, and we all set out for home.

15 I had been gone nearly three hours, and had wandered a number of miles. My brother Joseph's coming and asking for me, had first set them to inquiring and searching me out. I went into the room where my brother Rufus sat. He said, "Why, my poor little sister! I did not mean to send you off on such a wild-goose chase to the end of the rainbow. I thought you would know I was only *quizzing* you."

eldest—oldest
quizzing—playing a joke on someone

Adapted from "The Rainbow Pilgrimage" by Sara J. Lippincott from *McGuffey's Fourth Eclectic Reader*. Copyright 1920 by H. H. Vail.

Performance Task

You have read the passage from "The Rainbow Pilgrimage" in which a young girl named Gracie goes in search of riches at the end of a rainbow. Write an essay describing the lessons that Gracie learns from her search. Use evidence from the passage to support your response.

Your writing will be scored based on the development of ideas, organization of writing, and language conventions of grammar, usage, and mechanics.

Adding with Mixed Numbers

Name: _____

Add.

1 $4\frac{7}{8} + \frac{1}{8}$

2 $4\frac{7}{8} + \frac{1}{4}$

3 $4\frac{7}{8} + \frac{1}{2}$

4 $2\frac{3}{4} + \frac{1}{3}$

5 $2\frac{3}{4} + \frac{2}{3}$

6 $2\frac{3}{4} + \frac{5}{6}$

7 $1\frac{2}{5} + 1\frac{1}{2}$

8 $2\frac{4}{5} + 3\frac{1}{2}$

9 $3\frac{2}{3} + 3\frac{2}{5}$

10 $4\frac{5}{8} + 2\frac{2}{3}$

11 $5\frac{3}{4} + 2\frac{3}{5}$

12 $3\frac{5}{6} + 2\frac{7}{8}$

13 What strategy did you use to solve problem 3? Describe each step.

1. When the lit side of the moon gets smaller each night, the moon is _____.

7. When the lit side of the moon gets larger each night, the moon is _____.

2. How long does it take the moon to go from **FULL MOON** to **FULL MOON**?

8. How long does it take the moon to go from **FULL MOON** to **NEW MOON**?

3. What phase of the moon is this?

9. What phase of the moon is this?

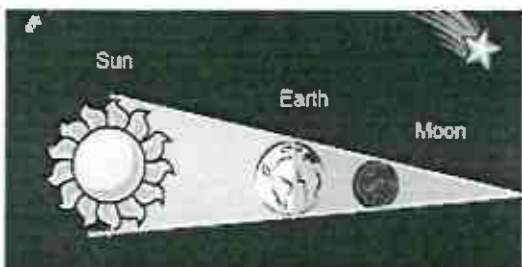

4. What phase of the moon is this?

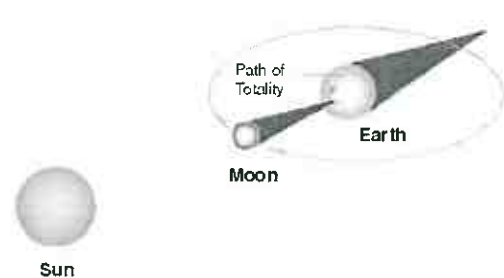

10. What phase of the moon is this?

5. What type of eclipse is this?

11. What type of eclipse is this?

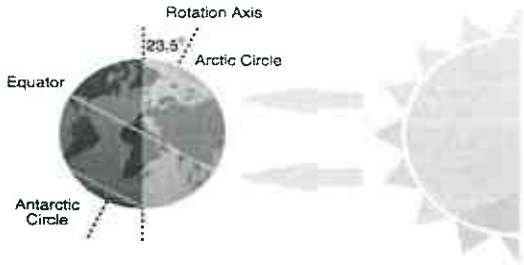

6. What causes day and night?

12. How long does it take the Earth to rotate one time?

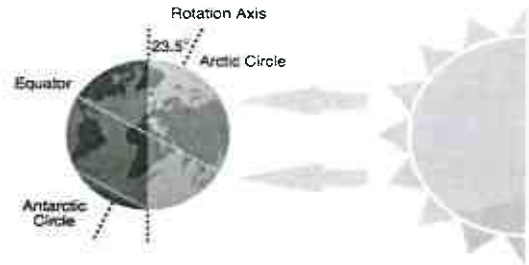

13 How many days does it take Earth to go around the Sun?

20 What does the word "revolve" mean?

14 Which hemisphere is experiencing summer?

21 Which hemisphere is experiencing winter?

15 Aristotle and Ptolemy believed the Earth was the center of the Universe. This belief is known as _____.

22 Copernicus and Galileo believed the Sun was the center of the Universe. This belief is known as _____.

16 What is the closest star to Earth?

23 What is the imaginary line where the sky appears to meet the Earth?

17 How many months does it take the Earth to travel around the Sun?

24 What force holds all the planets in our solar system in orbit around the Sun?

18 How is the moon lit?

25 How would you describe the new moon?

19 Why do we see the constellation Orion during winter, but not summer?

26 What constellation is the North Star located in?
