

AHERA Operations & Management Plan Revision Notes

Annual Notification

Dawson Springs Independent Schools

SPECIAL NOTE

TO: Parents, Guardians and School Employees

FROM: Alexis Seymore, Superintendent

SUBJECT: Asbestos Management Plan for Dawson Springs Independent Schools
2010-2011 Academic School Year

This notice is sent to assure you that the Dawson Springs Independent School System is in compliance with both national and state regulations and laws relating to building materials which contain asbestos that have been used in building construction in past years.

An inspection for building materials which contain asbestos has been completed for all school buildings owned, leased or otherwise occupied by Dawson Springs Independent Schools. This inspection has been conducted by a certified inspector, and the material samples were evaluated by an accredited laboratory. Building materials containing as little as two percent (2%) asbestos or assumed positive have been identified and made a part of an Asbestos Management Plan for the school system.

A complete Asbestos Management Plan for the school district is available at the Principal's office during regular business hours.

We will continue to notify you at least once each year on the status of the Asbestos Management Plan. Additional notifications may be issued as a result of an additional inspection, normal surveillance practices, response actions or remodeling work which might disturb building materials which contain asbestos. Every precaution will continue to be utilized in order to protect the well being of students and employees of Dawson Springs Independent Schools.

PUBLIC NOTICE

August 1, 2005

In accordance to EPA regulations, Dawson Springs Schools have been inspected for asbestos-containing material by accredited inspectors using methodologies specified in the Asbestos-Containing Materials in School Rule:

40 CFR.PART 763 (AHERA)

Asbestos-containing materials were found to be present in the elementary and middle schools. A record of the inspection, a diagram of the locations of asbestos-containing materials and the asbestos management plan for the schools are available in the Board of Education Office.

For further information, interested persons should contact Joe Loney or Alexis Seymore at 797-3811.
