Register with Science Explorers. Please do not send forms to school.

St. John Regional Catholic School

Wednesday Afternoons - 2:45-3:45 - Grades K-1 & 2-5

2019-20 School Year:

Slime After Slime (3-session club)

October 2, 9, 16

Pop, Bang, Fizz

October 23, 30, November 6, 13, 20

Wild About Weather

Not Available

Make Some Noise

February 5, 12, 19, 26, March 4

Oozy, Odd, Outrageous Animals

Not Available

Atomic Art

April 22, 29, May 6, 13, 20

Important Information!

Register early—class size is limited and many clubs fill quickly. A minimum number of participants is needed to run club. Please do not send forms to school; register online or mail form to Science Explorers. Club tuition is discounted if you register before the start date. Registrations will only be confirmed via email. Refunds are not permitted once session has begun. \$15 processing fee for all refunds. \$35 processing fee for returned checks. We are unable to pro-rate for any reason. Please note: Parent is responsible for child's attendance and prompt pick-up. Late pick-ups are subject to additional fees. In the event of inclement weather, Science Explorers will follow your school's dismissal procedure. By registering my child I grant permission and release Science Explorers and its affiliates from any and all liability relating to or arising from Science Explorers after-school club program.

Multi-Club Discount: Register for 3 or more clubs in one order and receive 5% off the total.

REGISTER ONLINE AT: ScienceExplorers.com or mail form to Science Explorers, 110 W. Wyomissing Ave., Mohnton PA 19540

SCIENCE EXPLORERS®

After-School SCIENCE CLUBS

New! Slime After Slime

Join in the fun as we make different slime creations over this 3-week intro into the wonderful world of polymers. We'll also experiment with magnetic fields as we make a very "attractive" slime, and we'll explore the electromagnetic spectrum as we create a variety of different types of slime that change color as if by magic in UV light.

Pop, Bang, Fizz

A pinch of this, a dash of that, some wild reactions are where it's at! Mix up a frozen ice cream treat and a fizzy bath popper to clean your feet. You won't believe our mixing fun can teach some science before it's done. With a pop or a bang or even some fizz, you have just become a chemistry whiz!

Wild About Weather

Have you ever seen golf ball –sized hail? Watched a lightning bolt slam into a tree and burn it to the ground? Sound scary? Not if you are prepared! Join us to learn all about weather. You, the meteorologist, will create and use your own weather station to predict changes in the weather. Construct a barometer to track air pressure changes, simulate a weather front, calculate wind speeds and make a tornado in a bottle. The forecast is all fun!

Make Some Noise!

Why does the shriek of a siren change as it passes by? Can a person's singing voice really crack a glass? We'll keep the good vibrations coming as we investigate the world of sounds and sound energy. Have a percussion party, make musical instruments and experiment with echolocation. Can you hear me now?

Oozy, Odd, Outrageous Animals

From slippery, slimy banana slugs to poison dart frogs, we'll explore the world of wacky creatures that suck blood, make slime, "fly" without wings, and re-grow all sorts of parts! Check out a real centipede and see if it really has 100 legs, create your own slug-slime, mix up a vampire bat treat that you can eat, make a "flying" squirrel, examine the anatomy of a frog and complete a dissection!

Atomic Art

Art and science go hand-in-hand, so put on your smock as we use brushes, bubbles and even nature itself to create scientific works of art. From making spin art machines to solar prints, you'll combine creativity and science to fashion many unique masterpieces that go beyond "refrigerator door" art!
