

May 15, 2019

Dear Jennings Families,

We are aware and deeply concerned about the recent reports of inedible food items being served in our schools. Our students expect and deserve high quality meals to provide them the energy required to meet our district's rigorous academic and personal standards.

I have met with the district's current food service provider to determine how this occurred and what processes exist to ensure that our students receive fresh and healthy meals each day. They have assured us they will be doing bi-weekly and monthly food audits. If our current provider is unable to meet the district's high standards, we will take the appropriate action to select another food service provider.

Thank you for supporting our schools. As always, you are welcome to contact me with any questions or additional concerns.

Sincerely,

Dr. Art McCoy
Superintendent of Schools
