March 19, 2020

Dear Tiger Family,

In order to best support our students' continued learning and growth during this time of school closure, the system has provided general e-learning recourses targeting all grade levels at www.hcbe.net.

Our teachers are working to provide more specific learning opportunities for each class and subject area. Please have your student check our school web page (tms.hcbe.net), and their teachers' Padlet pages for additional practice and resources. If you have questions, please feel free to email the teacher of record. We will be adding resources as time goes on. All of the resources and assignments are for our students to continue working at home and learning in a digital environment. The activities are not for a grade. Our intention is to simply help our students and parents with activities while they are at home. Every resource will be online at this time. We are not "passing out packets" or meeting students and parents at the school during this time.

I would encourage you also to utilize the system's website for added information about meal availability and for frequently asked questions to keep you informed during this unprecedented time. Please know the health and safety of our student and staff are what is most important, and I hope you and your family remain safe and healthy.

Thank you for your support for the entire Tiger family.

Greatness is a Process,

Dr. R. Scott Wynn
Principal
