In accordance with §19a-333-1 through 13 of the Regulations of Connecticut State Agencies, “Asbestos-Containing Materials in School,” we are required to inform you that asbestos containing materials have been identified in various areas of the schools, primarily in maintenance areas not accessible to students. Much of the material has been removed. What remains is included in an Operations and Maintenance (O&M) program. This program is designed to prevent asbestos fiber release through proper cleaning, maintenance and repair. The O&M program will remain in effect until all asbestos-containing building material (ACBM) is removed from the building.

The buildings are inspected every six (6) months to determine any changes in the conditions of the materials. Additionally, the buildings are thoroughly re-inspected every three (3) years by Connecticut licensed asbestos inspectors following the same basic criteria as the original inspection.

The Wolcott Public Schools maintain completed updated copies of the Asbestos Management Plan for each school in the Facility Directors office and each school maintains a copy of the plan in its main office. It is available during normal business hours for inspection. The Designated Person for the Asbestos Program is Wayne Natzel, and can be contacted at (203) 879-8180.
