May 14, 2020

Dear Parents,

If your child is in the class of 2021, 2022 or 2023, you may be wondering about the expectations for the career portfolio and we want to be sure you are all informed about the expectations for the 2019-2020 school year. On March 27, 2020 your child received an email from us explaining that this year's portfolio requirements were on hold and we would communicate if that changed. Please know that we value the experiences your child receives through the activities involved with completing the portfolio, however, the Coronavirus has prevented these experiences from being possible. As of March 13, 2020 New Brighton High School is considering this year's portfolio as complete. However, the state requires that students complete a number of assignments in each career domain. Students who have not yet completed these required assignments have been contacted by their counselor via email and will have an opportunity to complete them at the start of the 2020-2021 school year if completing the assignment(s) is not possible before Jun 4, 2020. If you have additional questions about career portfolios, please contact your child's counselor.

Sincerely,

Aimee Young (electronic)
