

# Greenville High School Pathways

One of the keys to improving student achievement is providing students with relevant contexts for studying and learning. Career pathways do exactly this by linking school-based learning with the knowledge and skills required for success in the workplace. The National Career Clusters® Framework is comprised of 16 Career Clusters® and related Career Pathways to help students of all ages explore different career options and better prepare for college and career. Each Career Cluster® represents a distinct grouping of occupations and industries based on the knowledge and skills they require. The 16 Career Clusters® and related Career Pathways provide an important organizing tool for schools to develop more effective programs of study (POS) and curriculum. At Greenville High School, we have arranged the Career Clusters into the following Eight 8 Pathways to Success:

## **Agriculture, Food, Natural Resources, Hospitality & Tourism**

The production, processing, marketing, distribution, financing, and development of agricultural commodities and resources including food, fiber, wood products, natural resources, horticulture, and other plant and animal products/resources. Preparing individuals for employment in career pathways that relate to families and human needs such as restaurant and food/beverage services, lodging, travel and tourism, recreation, amusement and attractions.

## **Architecture, Construction, & Manufacturing**

Careers in designing, planning, managing, building and maintaining the built environment. Also planning, managing and performing the processing of materials into intermediate or final products and related professional and technical support activities such as production planning and control, maintenance and manufacturing/process engineering.

## **Arts, A/V Technology, Communications, & Marketing**

Designing, producing, exhibiting, performing, writing, and publishing multimedia content including visual and performing arts and design, journalism, and entertainment services. Planning, managing, and performing marketing activities to reach organizational objectives such as brand management, professional sales, merchandising, marketing communications and market research.

## **Business, Management, Administration & Finance**

Careers in planning, organizing, directing and evaluating business functions essential to efficient and productive business operations. Planning and related services for financial and investment planning, banking, insurance, and business financial management.

## **Education, Training, & Human Services**

Planning, managing and providing education and training services, and related learning support services such as administration, teaching/training, administrative support, and professional support services. Preparing individuals for employment in career pathways that relate to families and human needs such as counseling and mental health services, family and community services, personal care, and consumer services.

**Law, Public Safety, Corrections, Security, Government & Public Administration**

Planning and executing government functions at the local, state and federal levels, including governance, national security, foreign service, planning, revenue and taxation, and regulations. Planning, managing, and providing legal, public safety, protective services and homeland security, including professional and technical support services.

**Science, Technology, Engineering & Mathematics (Information Technology & Health Sciences also)**

Planning, managing, and providing scientific research and professional and technical services (e.g., physical science, social science, engineering) including laboratory and testing services, and research and development services. Building linkages in IT occupations for entry level, technical, and professional careers related to the design, development, support and management of hardware, software, multimedia and systems integration services. Planning, managing, and providing therapeutic services, diagnostic services, health informatics, support services, and biotechnology research and development.

**Transportation, Distribution & Logistics**

The planning, management, and movement of people, materials, and goods by road, pipeline, air, rail and water and related professional and technical support services such as transportation infrastructure planning and management, logistics services, mobile equipment and facility maintenance.
