

Celebrations!

- HCLI data is in line with Milestones data
- For math:
 - 3rd grade average scale score increased 11 pts
 - 4th grade average scale score increased 6 pts
 - 5th grade average scale score increased 15 pts!!!!
- For ELA:
 - 5th grade average scale score increased 10 pts
 - 4th grade average scale score increased 8 pts
 - 3rd grade average scale score increased 18 pts!!!!
- Our school and KCES are the only schools in the district where our average student scored proficient in All grades and All subjects! This is huge!!!
- Our scale scores for ELA and Math are higher than they have ever been in the history of MAES!
- Our median (average) Lexile level for 3rd graders was 750. This is an 85 point increase over last year.
- Our 4th grade Lexile levels increased by 38 points!
- Our 5th grade Lexile levels increased by 55 points. The median (average) Lexile level for 5th grade was 1030 which is 40 points away (1,070) from the level they need to be reading at the END of 6th grade! This helps our students with middle school transition because they are already reading at and above grade level.
- The chart compares our school to other schools looking at level 3 and 4 (proficient and distinguished learner). Go over chart!!
