Dates to Remember

March 9th: Boosterthon Kick-off

March 12th: Report Cards go Home

March 23rd-27th: Spring Break!

Math News

This week, we are working on lessons 11.1 and 11.2. The lessons are Angles and Fractional Parts of a Circle and Degrees. We will relate angles and degrees to fractional parts of a circle. A daily grade will be given on **Thursday**.

Reminders

*All students need earbuds for Path Blazer lessons. It's very hard to focus when multiple students are on the computers trying to complete the lessons without earbuds.

I bought 20 nice headphone sets for \$11.00 each. They have already torn up 4 of them. I have not had them for 6 months. We still have a full nine weeks left of school and are working very hard.

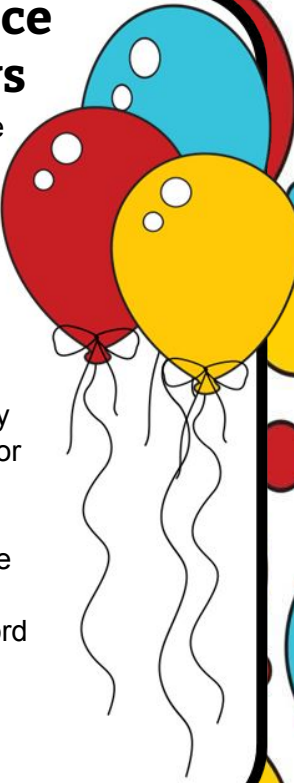

happy birthday

Science News

We will continue to work on the unit "Energy Works".

This week, we will build circuit testers. We will test items to determine if they are conductors or insulators. We will also learn about Alternative Energy. We will continue to record results in our notebooks and watch related videos.

Today you are you. That is truer than true. There is no one alive who is youer than you!

~ Dr. Seuss
