

Remote Learning Option

- **Remote Learning** (offered in grades PreK-12) will be provided for students that have concerns about returning to traditional school.
- The curriculum provided by the school system will be delivered by an online platform to a device at home.
- Students will not attend school or participate in any extra-curricular activities (clubs, athletics, band, etc.) due to concerns about COVID-19.
- This online program does not include any direct instruction by a teacher.
- Families that enroll in **Remote Learning** cannot transition back to traditional school until the change in the grading period (end of each 9 weeks).
- Remote learners will not be eligible for school meals. However, **please complete the free and reduced meal form**, so in the event you decide to send your child to resume the traditional learning option, at the end of the 9 weeks, or we have a complete school shutdown, we already have your information on file. The free/reduced meal form can be completed online either through the school website (les.dalecountyboe.org) or the district website (dalecountyboe.org).

Devices/Internet

- The student will be expected to provide their own device and internet connection at home for the **Remote Learning** option.
- Paper packets used in the Spring of 2020 will NOT be available.
- If a **Remote Learning** student does not have access to this technology, they should notify the counselor at the time of enrollment to see if an individualized plan can be created to provide the needed technology.
