

City Level Public Health Data for Schools

Mohave County Department of Public Health

April 19, 2021

NOTE: Data shown in this report have been updated to reflect criteria used by the Arizona Department of Health Services to produce state and county school benchmark data. For this Mohave County Department of Public Health report, positive tests now include only RT-PCR, with terminology updated to NAAT (nucleic acid amplification test). Cases include confirmed only. Criteria were applied retroactively so all weeks shown in the charts are comparable. Please note that these figures may not match figures from other sources as different criteria may have been used (e.g., the Mohave County COVID-19 Response Hub shows confirmed cases only.)

New Indicators and Thresholds for Community Transmission of COVID-19* (reported over 7 days) (from CDC's New Operational Strategy for K-12 Schools through Phased Mitigation)

Indicator	Lowest Transmission	Low Transmission Blue	Moderate Transmission Yellow	Substantial Transmission Orange	High Transmission Red
Total new cases per 100,000 persons in the past 7 days**	Category no longer exists. It has been merged into one low transmission (blue) category.	0-9	10-49	50-99	≥100
Percentage of NAATs that are positive during the past 7 days***		<5.0%	5.0%-7.9%	8.0%-9.9%	≥10.0%

**If the two indicators suggest different levels, the actions corresponding to the higher threshold should be chosen. County-level data on total new cases in the past 7 days and test percent positivity are available on the County View tab in [CDC's COVID Data Tracker](#).*

***Total number of new cases per 100,000 persons within the last 7 days is calculated by adding the number of new cases in the county (or other community type) in the last 7 days divided by the population in the county (or other community type) and multiplying by 100,000.*

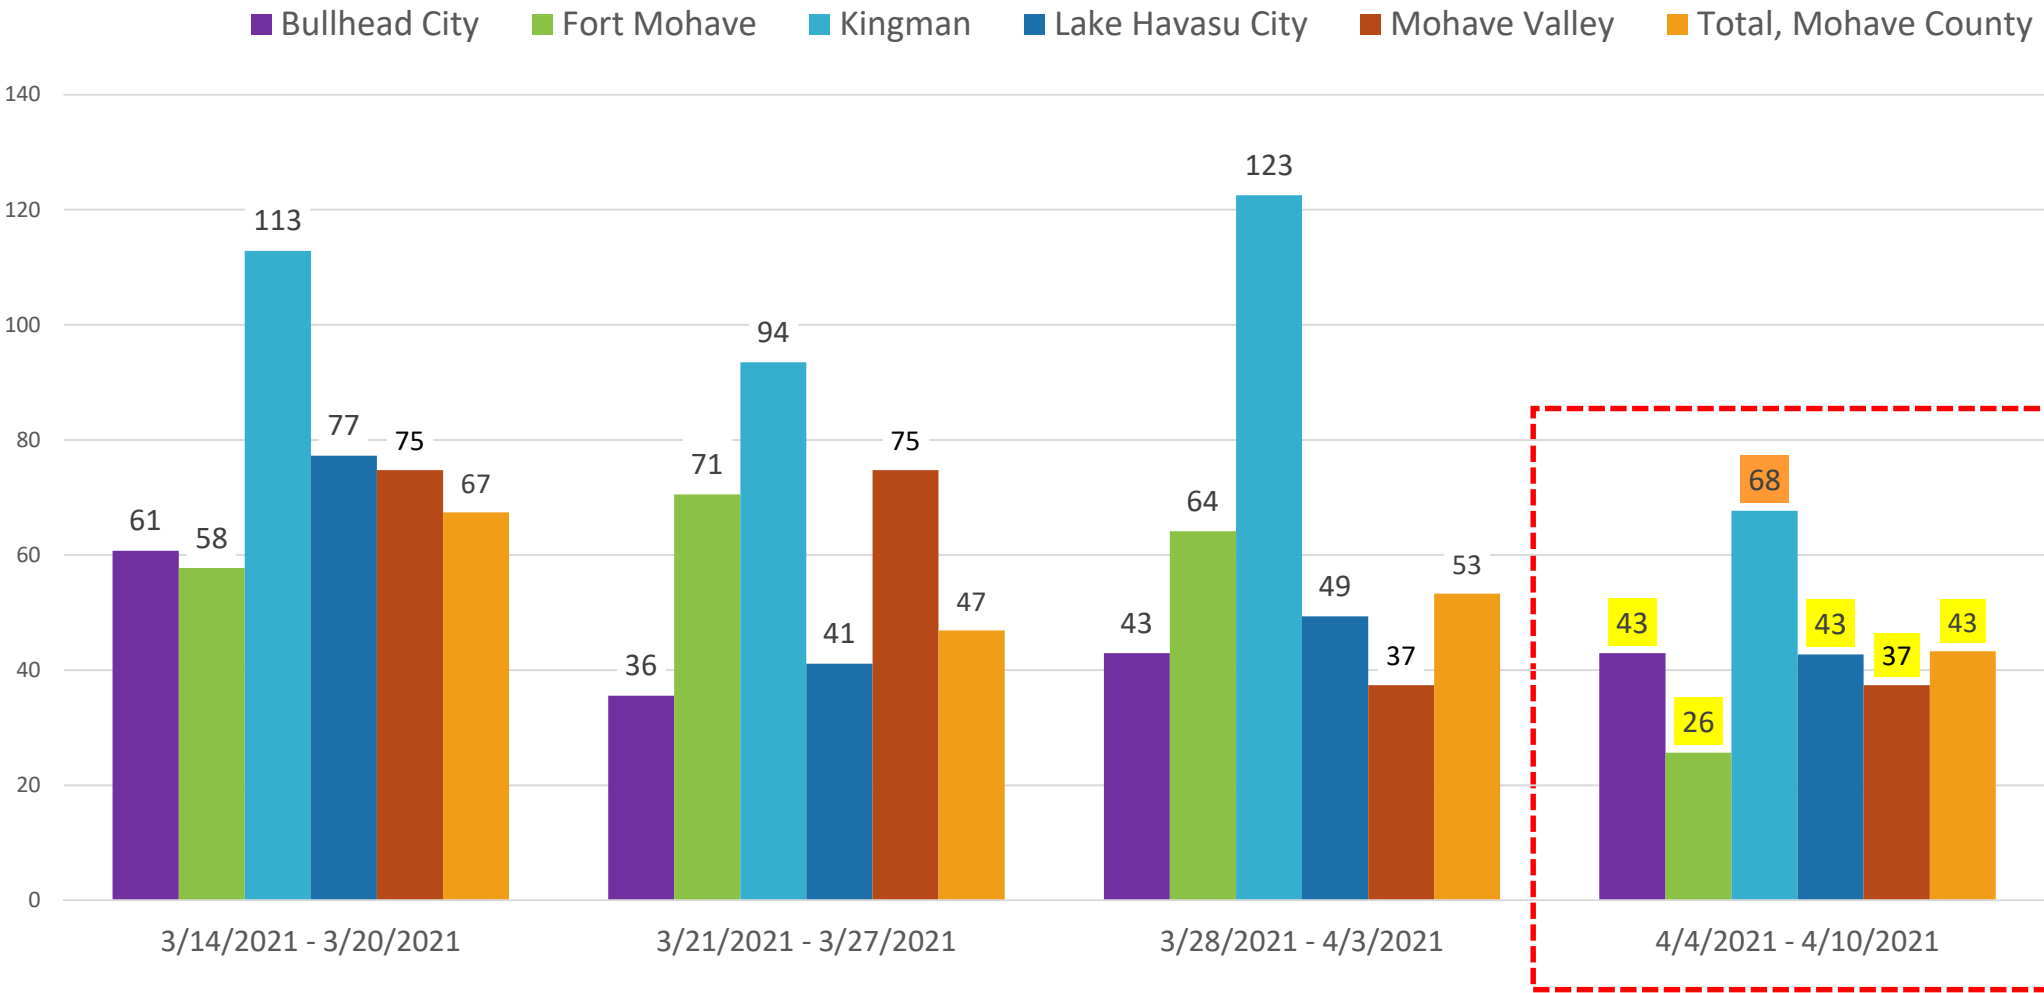

The Arizona Department of Health Services (ADHS) dashboard will be updated each Thursday with data from most recent complete calendar week.
