

Fourth Grade Essential Skills for Math

September

- I can use tables, bar graphs, timelines, and Venn Diagrams to display data.
- I can compare and order whole numbers using place value.
- I can name, describe, classify and sketch polygons and quadrilaterals.

October

- I can construct, classify, and describe triangles.
- I can measure angles in geometric figures using a protractor.
- I can classify angles as acute, right, and obtuse.

November

- I can multiply a number by 10, 100 and 1,000.
- I can estimate products of multi-digit whole numbers by rounding and place value.
- I can solve input-output rules involving addition and subtraction.

December

- I can read and write decimals with words and symbols using place value from thousands to thousandths.
- I can compare and order decimals.
- I can round decimals to the nearest tenth.

January

- I will know multiplication facts 0-10.
- I can use input-out rules involving multiplication.
- I can find the area of geometric figures.

February

- I can multiply multi-digit numbers.
- I can represent equivalent fractions using fraction models or manipulatives.
- I can add and subtract fractions with like denominators.

March

- I will know division facts 1-10.
- I can estimate quotients of multi-digit whole numbers.
- I can divide multi-digit whole numbers by one or two digits.

April

- I can solve multi-step real world problems using addition, subtraction, and multiplication.
- I can solve input-out rules involving multiplication.

May

- Review
