

Want to be a teacher?

The *mediocre* teacher tells.

The *good* teacher explains.

The *superior* teacher demonstrates.

The *great* teacher inspires.

William Arthur Ward

Teacher Shortage:

The teacher shortage is real, large and growing, and worse than we thought.

When indicators of teacher quality (certification, relevant training, experience, etc.) are taken into account, the shortage is even more acute than currently estimated, with high-poverty schools suffering the most from the shortage of credentialed teachers.

TROY UNIVERSITY™

Excellence in Education...

The Pike County School System has partnered with the Troy University—College of Education to deliver a program that gives aspiring educators a head start on teacher training. The leadership in the Pike County School System is dedicated to working with local, state, and regional stakeholders to identify needs and then explore how to meet that need.

There is a growing need for quality educators in nearly every area. Fewer teachers are going into teacher training programs and this is resulting in a lower number of overall teachers being produced. This does not specifically take into account education areas that have already been identified as “shortage” areas, such as: mathematics, science, special education, etc.

“Through this partnership, TROY’s College of Education will nurture those students who have a passion for the teaching field, mentor them through the process of earning a college degree, and position them as highly qualified educators who are well-equipped to be difference-makers in the classroom!”

Dr. Dionne Rosser-Mims, Dean
College of Education
