**ABOUT THE STAR PROTOCOL:**

The Virginia Tech STAR Protocol heavily emphasizes lower velocity impacts while placing less emphasis on high velocity impacts. All testing under the VA Tech STAR Protocol is conducted at 72° F, on size large helmets only. The Vengeance VTD II is engineered to maximize performance per the VA Tech STAR protocol. As a result, when subjected to increased impact velocity and elevated temperatures, the Vengeance VTD II may absorb less impact than other Schutt models."

Patent #8,069,498, #8,146,178, #8,201,269 WARNING: Keep your head up. Do not butt, ram, spear, or strike an opponent with any part of this helmet or faceguard. This is a violation of football rules and may cause you to suffer severe brain or neck injury, including paralysis or death and possible injury to your opponent. Contact in football may result in Concussion/Brain injury which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop and report them to your coach, trainer, and parents. Do not return to a game or contact until all symptoms are gone and you receive medical clearance. Ignoring this warning may lead to another and more serious or fatal brain injury. NO HELMET SYSTEM CAN PROTECT YOU FROM SERIOUS BRAIN AND/OR NECK INJURIES INCLUDING PARALYSIS OR DEATH. TO AVOID THESE RISKS, DO NOT ENGAGE IN THE SPORT OF FOOTBALL. TO ACHIEVE THE MOST EFFECTIVE PERFORMANCE OF A Schutt HELMET USE ONLY SCHUTT SPORTS REPLACEMENT COMPONENTS. WARNING: Do not attach any accessories that are not supplied by and/or approved to be worn with Schutt helmets. Attachment of accessories not supplied by or recommended for Schutt helmets will void the warranty and could adversely affect the protective capabilities of the helmet. If you are unsure if an accessory is approved, please visit [schuttsports.com](http://schuttsports.com). Due to differences in head shapes and sizes, adjustments may be needed to achieve proper fit and/or comfort. Please refer to the fitting instructions booklet included with each new Schutt helmet. Also available at [schuttsports.com](http://schuttsports.com). Using jaw pads from suppliers other than Schutt Sports will void the warranty.

Patent #8,069,498, #8,146,778, #8,201,269 WARNING: Keep your head up. Do not butt, ram, spear, or strike an opponent with any part of this helmet or faceguard. This is a violation of football rules and may cause you to suffer severe brain or neck injury, including paralysis or death and possible injury to your opponent. Contact in football may result in Concussion/Brain injury which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea, or confusion. If you have symptoms, immediately stop and report them to your coach, trainer, and parents. Do not return to a game or contact until all symptoms are gone and you receive medical clearance. Ignoring this warning may lead to another and more serious or fatal brain injury. NO HELMET SYSTEM CAN PROTECT YOU FROM SERIOUS BRAIN AND/OR NECK INJURIES INCLUDING PARALYSIS OR DEATH. TO AVOID THESE RISKS, DO NOT ENGAGE IN THE SPORT OF FOOTBALL. TO ACHIEVE THE MOST EFFECTIVE PERFORMANCE OF A Schutt HELMET, USE ONLY SCHUTT SPORTS REPLACEMENT COMPONENTS. WARNING: Do not attach any accessories that are not supplied by and/or approved to be worn with Schutt helmets. Attachment of accessories not supplied by or recommended for Schutt helmets will void the warranty and could adversely affect the protective capabilities of the helmet. If you are unsure if an accessory is approved, please visit [schuttsports.com](http://schuttsports.com). Due to differences in head shapes and sizes, adjustments may be needed to achieve proper fit and/or comfort. Please refer to the fitting instructions booklet included with each new Schutt helmet. Also available at [schuttsports.com](http://schuttsports.com). Using jaw pads from suppliers other than Schutt Sports will void the warranty.

# YOUTH FACEGUARDS

Our youth helmets should be outfitted with youth faceguards. These guards are designed specifically for younger players who aren't as strong as their varsity counterparts. A higher attachment point for youth faceguards allows younger, smaller players to properly take off and put on their helmets.

## YOUTH VENGEANCE FACEGUARDS

# AIR MAXX FLEX 2.0

## AIR MANAGEMENT SYSTEM

The protective shoulder pad cushion is made of open cell foam with microscopic air chambers. The outside fabric is sealed to the foam trapping the air inside the cushion. When impact occurs on the shoulder pad arch the load is spread. The impact causes the arch to engage the cushion, which forces the air within the cushion to move throughout the foam chambers dissipating the pressure. The impact energy is dispersed over a larger area reducing the amount of force impacting the body.

## TPU CUSHIONING

Air Maxx TPU cushioning that is used in our best performing helmets is featured in our new Air Maxx Flex 2.0 Shoulder Pad Series. TPU cushioning is positioned over the shoulders providing enhanced impact absorption. Air Maxx TPU is durable and will not break down - even after thousands of impacts.

## ENERGY LOCK TECHNOLOGY POWERED BY D30®

Energy Lock Technology powered by D30® is a lightweight, soft, and flexible material featuring unique molecular properties. In standard conditions its molecules flow freely, but on impact, they lock together to absorb impact energy and reduce the force transmitted. The material is rate sensitive, so the harder the impact, the greater the resistance to the force. Our D30® technology is strategically positioned over the shoulder for optimal impact absorption.

## CLAVICLE CHANNEL SYSTEM

System absorbs impact specifically around the AC joint and provides maximum shoulder protection. The hook and loop pad attachments can be re-positioned or removed to ensure a precise fit and complete coverage in the key hitting areas.

## TACTICAL ARCH DESIGN

High performance arch designs minimize weight without sacrificing hitting zone protection. Keeps cushions in proper hitting position with less "upward" movement of shoulder pads.

Epaulets and caps (low profile) eliminate "grab" points and create better overall performance.

Position specific arches include QB/WR, Skill for RB/DB, All Purpose for FB/LB/TE and OL/DL with Non-Epaulet design.

Raised corrugations for additional strength and increased air flow.

## OTHER FEATURES

Flat Pad Design is low profile for improved mobility. BIOTHANE™ belts create a snug and secure fit while securing the shape of the arch to maximize range of motion.

Pre-drilled for accessory attachment.

Removable deltoid and scapular pads for a custom fit.

Stainless steel hardware.

Removable body for easy hand washing of cushions.

## AIR MAXX FLEX 2.0 QB|WR

Quarterback, Wide Receiver

The AIR Maxx Flex 2.0 QB|WR pad offers an attached back plate and smaller arch cut that protects while still allowing for maximum flexibility and range of motion. The AIR Maxx Flex 2.0 also features a hinged front connection.

MSRP: \$310.00

What about shoulder pad accessories? You can complete your customized look, starting on page 96 of our accessories section. Here you'll find exclusive color-matched back protection, as well as some all-new color variants of our back plates and rib protectors.

Scarlet (03) | Black (06)

Maroon (12) | Black (06)

Navy (08) | Vegas Gold (28)

## IMPACT MANAGEMENT SYSTEM

The O2 Pro showcases many of the features of the Air Maxx Flex 2.0 in an all-new body style. The impact management system of the O2 Pro handles forces and hits through a high impact perforated EVA foam. This pad not only dissipates force upon impact, it is the most breathable shoulder pad in the industry with perforations throughout the body of the shoulder pad. The perforated EVA foam and O2 windows allow air flow to and from the body encouraging the skin to dry and the body to continue its natural cooling action.

## TPU CUSHIONING

Air Maxx TPU cushioning that is used in our best performing helmets is featured in our new O2 Pro Shoulder Pad Series. TPU cushioning is positioned over the shoulders providing enhanced impact absorption. Air Maxx TPU is durable and will not break down - even after thousands of impacts.

## ENERGY LOCK TECHNOLOGY POWERED BY D30®

Energy Lock Technology powered by D30® is a lightweight, soft, and flexible material featuring unique molecular properties. In standard conditions its molecules flow freely, but on impact, they lock together to absorb impact energy and reduce the force transmitted. The material is rate sensitive, so the harder the impact, the greater the resistance to the force. Our D30® technology is strategically positioned for optimal impact absorption.

## CLAVICLE CHANNEL SYSTEM

This system absorbs impact specifically around the AC joint and provides maximum shoulder protection. The hook and loop pad attachments can be re-positioned or removed to ensure a precise fit and coverage in the key hitting areas.

## TACTICAL ARCH DESIGN

High performance arch designs minimize weight without sacrificing hit zone protection. These new arches are engineered for maximum range of motion and mobility.

Streamlined and balanced arch designs keep arches and cushions in proper hitting position with less "upward" movement of shoulder pads.

Newly designed, positioned and sized epaulets and caps (low profile) eliminate "grab" points and create better overall performance.

Raised corrugations for additional strength and increased air flow.

## OTHER FEATURES

The body cushion has O2 windows which are large openings that maximize air circulation, allowing excess heat to escape and sweat to evaporate. The windows are positioned in the front and back arch portions.

Ventilated arches with raised corrugation and 7 mm vent holes combine with perforated high impact EVA foam throughout the body cushion also encourage heat and sweat movement.

BIOETHANE™ belts create a snug and secure fit while securing the shape of the arch to maximize range of motion.

## 02 PRO QB|WR

Quarterback, Wide Receiver

The 02 Pro QB|WR pad offers an attached back plate and smaller arch cut to reduce the plastic that gets in your way. The arch cut allows maximum range of motion and versatility.

MSRP: \$250.00

### SMALL

### 3X-LARGE

Item # 80265708  
Shoulders 21 - 22"

WARNING: These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

## O2 PRO OL/DL

Offensive Line, Defensive Line

The O2 Pro OL/DL features our exclusive non-epaulet design available only from Schutt Sports. The elimination of the epaulets on this pad gives you a huge advantage: The opponent has nothing to grab and leverage against you.

MSRP: \$250.00

Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

# XV HD

The XV HD has many of the same features as our pro-level shoulder pads and features high-density EVA foam for greater impact absorption and durability. The moisture and heat management system of the XV HD allows airflow to and from the body which allows the skin to dry and the body to continue its natural cooling action.

#### TACTICAL ARCH DESIGN

High performance arch designs to minimize weight without sacrificing hitting zone protection. These new arches are engineered for maximum range of motion and mobility.

Streamlined and balanced arch designs to keep arches and cushions in proper hitting position with less "upward" movement of shoulder pads.

Designed, positioned and sized epaulets and caps (low profile) eliminating "grab" points and creating better overall performance.

Position specific arches include QB/WR, Skill for RB/DB, All Purpose for FB/LB/TE and OL/DL with Non-Epaulet design.

Raised corrugations for additional strength and air flow.

#### HEAT AND MOISTURE MANAGEMENT

High density EVA foam is perforated throughout the body cushion allowing heat to escape.

The ventilated arch has raised corrugations and 7 mm vent holes to allow heat to escape and excess sweat to evaporate. Multi-Axis air flow channels maximize breathability.

#### CLAVICLE CHANNEL SYSTEM

This system absorbs impact specifically around the AC joint and provides maximum shoulder protection. The hook and loop pad attachments can be repositioned or removed to ensure a precise fit and coverage in the key hitting areas.

#### OTHER FEATURES

Flat Pad Design is low profile for improved mobility.

BIOETHANE™ belts create a snug and secure fit while maintaining the shape of the arch to maximize range of motion.

Pre-drilled for Accessory attachment.

Removable deltoid and scapular pads.

Removable body cushion for easy cleaning.

The lightest varsity shoulder pad we can build while maintaining high performance standards.

## XV HD QB|WR

Quarterback, Wide Receiver

MSRP: \$190.00

### SMALL

Item # 80130503  
Shoulders 16 - 17"

### MEDIUM

Item # 80130504  
Shoulders 17 - 18"

### LARGE

Item # 80130505  
Shoulders 18 - 19"

### X-LARGE

Item # 80130506  
Shoulders 19 - 20"

The XV HD QB|WR pad offers an attached back plate and smaller arch cut to reduce the plastic that gets in your way. The arch cut gives you maximum range of motion and versatility.

WARNING: These pieces of protective equipment are designed to reduce the possibility of injury to the specific body part which they cover. Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

### AIR MAXX TPU CUSHIONING

AIR Maxx TPU cushioning that is used in our best performing helmets is positioned over the shoulders providing enhanced impact absorption. AIR Maxx TPU is durable and able to stand up to thousands of impacts.

### HEAT AND MOISTURE MANAGEMENT SYSTEM

This protective shoulder pad cushion is made of perforated dual-density foam covered by two breathable layers (front and back) that allow the heat to migrate away from the body keeping you cooler.

### CLAVICLE CHANNEL SYSTEM

This system absorbs impact specifically around the AC joint and provides enhanced shoulder protection in the key hitting area.

### OTHER DESIGN FEATURES

Raised corrugations for strength and increased air flow

Flat Pad Design is low profile for improved mobility

BIOTHANE™ belts create a snug and secure fit while maintaining the shape of the arch to maximize range of motion

Pre-drilled for Accessory attachment

Stainless Steel Hardware

# MID FLEX 4.0

Use of this equipment does not guarantee that you will be protected from serious, disabling or permanent injury while playing football. Any modification or alteration without the permission of the manufacturer could reduce the protective capacity.

### HEAT AND MOISTURE MANAGEMENT

Perforated dual-density padding combined with breathable mesh and 7mm vent holes in the arches makes the Mid Flex 4.0 body cushion breathable and allows maximum air flow keeping you cooler than most youth pads.

### THREE POINT BELT SYSTEM

The adjustable elastic belt features attachment to the arches at three points. The two points of attachment at the back arch provide a more snug fit pulling the arch to the body. This better fit means less movement and more consistent protection.

### ANTIMICROBIAL TREATMENT

The body cushion materials are treated with an antimicrobial solution that prevents the growth and spread of mold and bacteria.

### ALL PURPOSE PERFORMANCE

The Mid Flex 4.0 arch design is meant for use all over the field. The arches are meant to give protection while allowing freedom of movement. The raised corrugation provides added strength to the arch in key hitting areas. The integrated clavicle channel blocks give an added layer of protection around the shoulder.

# Y-FLEX 2.0

A lightweight, all purpose design for the exceptional youth athlete looking for varsity style protection. The extended body length adds extra protection.

MSRP: \$52.00 - \$66.00
