

5TH GRADE ART LESSON WEEK 2

In this lesson you will learn how to cord weave. Cord weaving is useful for many things such as straps and bracelets. I wear a cord bracelet on my left wrist you may have seen it before. It's a very strong weave.

Supplies:

Cardboard

Scissors

Pencil or marker

Circle tracer (like yogurt top)

8 strings of fiber (thread or yarn or embroidery floss or anything you have on hand you could use old shoelaces!)

[Here](#) is a link to the video. This video was also created by Cassie Stephens the art teacher in Tennessee. She will show you how to create a circle loom and how to weave a cord. There are many different ways to weave a cord and you might find other useful videos on youtube. If you make extra cords bring some back to school when we return to share with your friends!

Optional: create a large cord weave to hang other art from in your room!
