

Fall 2021

High School Early Admit: Available Classes

ACC 200 – GW1: Financial Accounting (3 credits)

The fundamentals of accounting concepts and procedures for sole proprietors, partnerships and corporations. The interpretation and use of financial statements and other relevant accounting information will be emphasized.

ARB 101 – GW1: Elementary Arabic I (3 credits)

This is the beginner level in Arabic. This course covers and emphasizes the development of the basic skills of the Arabic language and includes instruction in basic pronunciation, comprehension, communication, and grammar. Students will also become acquainted with the culture of the Arab world and establish a solid foundation for more advanced courses in Arabic.

ART 109 – G01: Landmarks of World Art (3 credits)

Landmarks of World Art is an introduction to the defining moments of world architecture from prehistory to the present.

BUS 242 – GW1: Business Law I (3 credits)

This course is designed to introduce students to the American legal system, increase their understanding of legal issues and potential liabilities in business contexts, and equip them to meet their legal obligations with ethical integrity in a competitive marketplace. Topics will include the structure and function of the American legal system, contracts, torts, white-collar crime, business organizations, and intellectual property law, with emphasis on legal reasoning and policy implications.

CDC 101 – G01: Public Speaking (3 credits)

This course is designed to develop the knowledge and skill necessary for preparing and presenting extemporaneous speeches to accomplish informative and persuasive goals on issues of civil, political, or cultural importance. Course topics include audience analysis, research, organization, language use, and delivery that facilitate effective communication with audiences.

CIS 110 – GW1: Intro to Information Systems (3 credits)

This course is an introductory study of information systems. Major topics include: the role and value of information systems, hardware and software used in information systems, managing information and data resources, decision making, and developing information systems.

CIS 120 – GW1: Application Programming I (3 credits)

This course provides students with an understanding of business problems that are typically solved by writing computer programs, problem solving techniques to enable students to design solutions, and programming skills learned in a traditional CS1 course. Emphasis is placed on

efficient software development for business related problems. Students are required to write, test and run programs.

CSC 101 – GW1: Personal Productivity Software (3 credits)

This course provides a structured laboratory experience designed to develop and enhance a student's proficiency in using selected Windows microcomputer application software packages.

ECO 201 – GW1: Principles of Microeconomics (3 credits)

This course focuses on explaining the economic choices made by individuals, households and firms. Topics to be covered will include: consumer choice, supply and demand and markets, production and costs, economic efficiency, and market structure.

ECO 202 – GW1: Principles of Macroeconomics (3 credits)

This course is an introduction to the study of the economy as a whole. Important topics include the determination of national income, the problems of inflation and unemployment, international trade, and economic growth. Simple models used to study the macroeconomy will be introduced and used to study changes in key variables. Emphasis is placed on the roles of monetary and fiscal policy in the conduct of macroeconomic policy.

ENG 101 – G01: English Composition 1 (3 credits)

Composition I is a sequel to English Language Skills. It provides guided practice in writing, with emphasis on thoughtful analysis of subject matter, clear understanding of the writing situation, flexible use of rhetorical strategies and development of stylistic options, particularly those related to an understanding of a variety of purposes and voices. ENG 101 continues the development of the essential writing, reading and thinking skills stressed in ENG 100.

FRE 101 – GW1: Elem French I (3 credits)

For the student without previous knowledge of French. The development of the fundamentals of correct idiomatic French. Instruction in basic audio-lingual comprehension, sentence structure, reading, writing and speaking. Classroom instruction is supplemented by laboratory study and practice.

GEO 100 – GW1: Introduction to Geography (3 credits)

This course introduces students to regional differences throughout the world in terms of land forms, climates, soils and vegetation as well as population characteristics and economic activities. Representative areas, such as western Europe, Russia, Japan and Latin America, are developed.

HIS 101 – GW1: US Hist to 1877 (3 credits)

American history from the Pilgrims to the age of modern industry: the Colonial heritage, American Revolution, the emergence of a new nation, westward expansion, Civil War and postwar Reconstruction.

HSC 110 – GW1: Human Anatomy & Phys I (4 credits)

This course entails the study of the structures and functions of the human body. The course takes a systematic, level of complexity approach, beginning on the sub-cellular level and progressing to the study of entire organ systems. Specific systems that are studied include the integumentary, cardiovascular, lymphatic, gastrointestinal, respiratory, urinary, endocrine, and reproductive.

HSC 115 – GW1: Current Health Issues (3 credits)

Current Health Issues is a course designed to convey information concerning the individual's role in establishing a healthful lifestyle as well as encouraging prevention of disease and a focus on healthful living. The basic themes from the text include personal responsibility, a commitment to prevention, practical applications of knowledge, and a focus on behavioral change.

HSC 120 – G01: Human Anatomy & Phys II (4 credits)

This course, a continuation of Human Anatomy and Physiology I, entails the study of the structures and neuromuscular functions of the human body. The course takes a systematic approach to the study of the anatomy and physiology of the bones, joints, muscles and nerves. Laboratory experiences reinforce the didactic portion with prosected human cadavers, human skeletons, and a variety of anatomical models.

JUS 101 – GW1: Introduction to Crim Justice (3 credits)

The course covers the nature, scope and impact of crime in the United States; independent and interdependent operations and procedures of police, courts and corrections; and introductory theories of crime and delinquency. The course introduces the justice model in a systematic way whereby students delve into the numerous components of the justice system, including law enforcement, legal and judicial process and correctional operations. Career opportunities will be fully covered throughout the course.

MAT 181 – GW1: College Algebra (3 credits)

Fundamental operations; factoring and algebraic fractions; exponents and radicals; functions and graphs; equations and inequalities; properties of graphs; systems of linear equations; synthetic division; rational zeros of polynomials; and logarithmic and exponential functions.

This course is an introduction to such major philosophical issues as the nature of knowledge, reality, religion and morals.

PSY 100 – GW1: General Psychology (3 credits)

This course is an introduction to the scientific study of behavior and mental processes. It explores topics such as the biological basis of behavior, research methods, learning, emotions, cognitive processes, perception, personality, abnormal behavior and the treatment of mental disorders. Research as well as practical application is stressed.

PSY 150 – GW1: Lifespan Dvlpmntl Psychology (3 credits)

Students completing this course will have an awareness of the biological, cognitive and social factors that impact physical, mental, social, and emotional development throughout the life-span. The course will present the research methodology common to this field of psychology as well as the major theories and their application to stages of life.

SOC 100 – GW1: Prin of Sociology (3 credits)

This survey course permits students to explore the rich variety of topics studied by sociologists. Central to all the topics are the structures and processes of human interaction. Emphasis is placed on the relationship of natural and social factors in human behavior. Attention also is given to topics such as the meaning and function of culture; the origin, function and characteristics of social institutions; and the genesis and nature of social pathology. Sociologists investigate groups, organizations, and societies, and how people interact within these contexts. It is an expanding field whose potential is increasingly tapped by those who craft policies and create and evaluate programs. Sociology is an active science: The concepts, theories, and research methods of sociology can be used in practical, concrete ways to create a better world, or simply a better corner of the world.

SPN 101 – GW1: Elementary Spanish I (3 credits)

This course is designed for the student without previous knowledge of Spanish who wishes to achieve a command of language fundamentals. Acquisition of speech skills in the classroom is reinforced in the language laboratory. Progressively greater emphasis is placed on reading and writing.

SPN 102 – GW1: Elem Spanish II (3 credits)

This is a continuation of Spanish 101.

WST 200 – GW1: Intro to Women Studies (3 credits)

Women's Studies 200 examines both the diverse and the collective experiences of women and men. The complex intermingling of privilege and inequality that intersect and diverge among women's and men's identities and roles will be analyzed. The impact of gender in arenas such as education, work, family, sexuality, identity, entertainment, sports, religion, and social policy will be explored.
