

3RD GRADE ART LESSON WEEK 1

In this lesson we are going to draw MAD scientists! Can you remember what it's called when artists draw pictures of people? It's called a portrait! So, we will be drawing portraits of scientists! Scientists are hard at work all over the world trying to learn more about all the germs! Try to remember to fill your paper! Don't draw teeny tiny scientists!

Supplies:

Paper
Pencil
Eraser
Sharpier
Crayons
Markers
Paint (optional)

[Here](#) is a video for a guided drawing of a scientist! This video is made by the AMAZING art teacher Cassie Stephens who lives in Tennessee. She will show you how to draw a boy or girl scientist and you can pick what you would like to draw. Remember to draw lightly! Pause the video as you need while she guides you.

Optional:

- Research Albert Einstein who was a famous scientist! He is the crazy looking guy outside of Ms. Christopher's room in the 3rd grade hall!
- Draw equipment that scientists might use to put in the background of the artwork! Or bubbles from experiments!

Student examples!
