Auburn University of Montgomery: Bachelor's of Science in Elementary Education (2008)

### Experience

---

Daniel Pratt Elementary School

4th & 5th Grade Math, Science, & Social Studies Teacher

August 2008- Present

### Bio

---

This is my fourteenth year teaching at DPES. I have been at DPES my entire teaching career and have taught math, science, and history in fourth and fifth grades. I am very excited about teaching my passion to my students! In my classroom, I teach different strategies so that each child can decide for themselves which strategy works best for them. I implement games, technology, and small group instruction daily to enhance and reinforce the skills I teach. My goal is for all children in my room to have an enjoyable learning experience every day and to help them realize that they are wonderful and unique people who can make the world a better place.

Parents,

I am here to help your child achieve excellence and I know that this can only happen when teachers and parents work together. Please feel free to email me if you have any questions or concerns.

Heather Skinner :)
