## SEPARATING INTO PARAGRAPHS

### We Need an After-School Running Club

Day 1: Organize Writing into Paragraphs

Students at our school can't go outside to walk clubs, chess clubs, or fiddle and homework clubs. However, I feel like we need after clubs to help students stay active after classes are over. Our school really needs to start a running club.

After I finish a long day of school, the last thing I want to do is jump right into homework and projects. A running club would help me and other students get an active experience before getting into homework and studying. It would be great to be able to get outdoors right after school and be active in the fresh air after being stuck indoors most of the day.

Running is one of the most effective ways to stay healthy and in shape. Running works more muscles than any other workout. Running also helps your respiratory system and gets your heart pumping. It is also an easy sport to learn quickly. I think everyone already just knows it from watching and then running and jogging around their whole lives. Running can also be done by people who don't like contact sports and people who have poor coordination, so it is very inclusive.

Many students would love to participate and be part of a team, but their parents might not be able to always afford it the costs of team sports. A free after-school running program would help those students. They could be part of a team, join in the fun after-school activity, and have fun with their fellow classmates. Since the school doesn't need to build a big stadium or anything, we can run elsewhere.

There are so many benefits of an after-school running program. Participation would be free and supervised so we could have students. Lots of kids could join, even if they couldn't afford other programs. I really think that students at our school would greatly benefit from this fun, free, and healthy program. This would make a big change for our students without much difficulty to put it into place. Let's run!

## REVISE THE CONCLUSION

The slide is displayed within a software window, with a taskbar visible at the bottom showing various application icons.
