Rationale

Certificate renewal is an outcome of applying Georgia Professional Standards Commission (GaPSC)-accepted continuing professional learning toward the continued validity of a state certificate or license. While it is essential for individual educators to maintain valid certificates and licenses, professional learning should be focused toward school improvement leading to improved teaching and increased student learning. The goal of certificate renewal and professional learning is for educators within a Georgia local unit of administration (LUA) to work together to enhance established educational goals for the individual educator, the school and the LUA to assist students in meeting state standards for student achievement. Written Professional Learning Plans (PLPs) or Professional Learning Goals (PLGs) shall be required for all certificate holders employed by a Georgia LUA. PLPs outline requirements for the professional growth of educators as well as clearly delineate support the school or school system will provide for the educator's professional growth. PLGs outline identified areas for educator growth for those educators not required to have PLPs. All professional learning approved for certificate renewal shall be designed around national professional learning standards as outlined by Learning Forward (formerly the National Staff Development Council). This requirement applies to the design of school and LUA learning communities, the selection of workshops that support learning communities, and any other professional learning designed for certified educators.

The PLP outlines specific requirements for the professional growth of the educator and targets areas for growth based on his/her scores on the statewide evaluation system. The PLG is more general in nature and should not only be directly associated with the educator's annual personnel evaluation, but it will also address the growth of the educator in terms of the contributions he/she makes to the professional learning community. In addition, for educators evaluated under the statewide evaluation system, the PLP or the PLG may be related to any of the following:

- Field(s) of certification held,
- School/District Improvement Plan, or

- State/federal requirements.
