

From the Nurse's Desk - Parent Reminders

1. Remember to keep your child home if they have a fever of 100 degrees or higher or if they are sick.
2. If a student becomes sick at school, please have a plan to pick your student up promptly and take him/her to their primary care doctor or urgent care for evaluation and testing.
3. The student may return to school when they are no longer sick if they do not have Covid-19. They need to provide a note with an alternative diagnosis from their MD or urgent care provider.
4. If the student tests positive for Covid-19 they will need to quarantine for 10 days. They may return to school on day 11 if they have no fever without fever reducing medicine and their symptoms have improved.
5. Please provide your school administrator or school nurse with a copy of the positive laboratory test result.
6. If you get a call from your school nurse stating your child is a close contact to a case, then your student will need to stay home for 14 days - even if they test negative.
7. If your student is required to quarantine, they cannot participate in extracurricular activities until their quarantine days are complete. Students breaking quarantine will be reported to Alabama Department of Public Health.

For any question or concerns, contact your student's school administrator.
