Coronavirus Update,

Ardmore High School administration has been made aware that there has been a positive test for Coronavirus in one of our athletic groups. The positive test was self-reported and the individual is asymptomatic. The person got tested because they became aware that someone, they knew had tested positive.

Because our coaches have been closely following the protocols, we were able to contact everyone in the group. We have suspended workouts for that group until July 13. We will continue with all other groups and continue to screen and follow CDC, ALSDE, ADPH, AHSAA, and LCS guidelines to keep our student athletes as safe as possible. One last tidbit. If you didn't get contacted you were not in an impacted group. If you did get contacted there is no need to get tested unless you begin to display symptoms. We will continue to monitor this situation and pass along updates as needed.
