

Apprenticeship Randolph is Randolph County's premier opportunity for students to get a jump start on a professional career in our booming local industries. Students have the opportunity to maximize earning potential, gain valuable skills and experience through on-the-job training, and earn an Associate of Applied Science degree in Manufacturing Technology from Randolph Community College at no cost to the student.

This year, we are celebrating two groups of apprentices.

The first group just finished their first full year of Apprenticeship Randolph. These students will be able to begin working full time, and continue attending college this fall.

These students are:

Brandon Dycus

William Flores

Devin Owens

Zachary Stinnett

The second group is beginning their pre-apprenticeship in hopes that they will be chosen to continue as registered apprentices in the fall. These students will be taking summer college classes as well as be employed full-time this summer.

These students are:

Tyler Hulin

Monye McQuaig-Graham

All college tuition, fees, and books are paid for while they are in the program. The apprenticeship is valued upwards of \$125,000 over the course of four years.
