

Safety - Health Checks

What is a health check? As students load buses and arrive at school in the morning, they will be visually reviewed for symptoms of COVID 19 and surveyed about whether they are experiencing any symptoms. If there are symptoms during these health checks or any time during the school day, students will be housed respectfully in a private location near the nurse's office and parents will be contacted to pick the student up. While the student is waiting, they will be required to wear a facemask. Afterwards, the family will be contacted as a follow up to ensure that the student is OK. In these cases, the Health Department will be contact to further advise regarding possibility of using contact tracing to determine if other students may be affected or whether a quarantine must be put into action.
