

# Accessing NWEA in Computer Lab

---

**Objective:** This guide will walk you through how to access the NWEA online testing app for students.

## Accessing the Applications

1. Make sure the students logs into the network with either their personal account or a generic account if that is typically what is used to sign-in to the computers in the lab (i.e. como, ghe, etc.)
2. Students will need to click on the NWEA Secure Testing Browser icon on the desktop to launch the secure browser needed for testing. Reference image below.

3. The online testing application will launch and students will see the screen below. On this screen, students will enter the **Session Name** and **Session Password**. Students can begin testing once they are logged in.
