

Wellness Policy

Hatch Valley Public Schools

Revised 2018

District School Wellness Policy

This policy outlines the District's approach to ensuring environments and opportunities for all students to practice healthy eating and physical activity behaviors throughout the school day while minimizing commercial distractions.

Policies within this document are intended to create a school environment that protects and promotes the health of our students. This policy applies to all schools in the district. Our commitments to providing nutrition education and regular physical activity, as well as access to nutritious foods for all students is included here.

The Hatch Valley Public School District believes that for students to have the opportunity to achieve personal, academic, developmental, and social success, we need to create positive, safe and health –promoting learning environments at every level, in every setting throughout the school year.

NOTES:

In January 2017 after review of the YRRS Data, the SHAC made a recommendation to the Board of Education to implement a full service SBHC at Hatch Valley High School. Public Meetings were held and there was opposition to the contraception and sexuality. However, the School Board voted 4 to 1 to move forward with the School Based Health Center with all services being offered.

>Update February 2018, the SBHC is up and running and very busy!

I. Parent & Community Involvement

The School Health Advisory Council (SHAC) shall meet at least once per semester. The Council shall consist of parents, school food authority, school board member, school administrators, school staff, students and community members.

The School Health Advisory Council (SHAC) will provide input and work collaboratively with the district personnel to review and revise the District Wellness Policy as necessary.

II. Health Education

Health Education will be taken in the middle school, in the eighth (8) grade for high school credit as required by Section 22-13-1.1 NMSA 1978. This course is required for graduation from Hatch Valley High School.

Any high school student who fails to obtain credit (transfer or failure) in their eighth grade year will make up the course via the approved online version in either IDEAL NM or Edgenuity.

*Revised 2016; and be provided the opportunity to take the First Aid hands on portion during physical education when this unit is taught.

The health curriculum aligns with the NM PED Standards and Benchmarks. The course will be comprehensive, including sexuality, HIV and related issues. Parents have an "OPT Out". See Board Policy for opt out procedures.

*REVISED 2016- The health education course shall include lifesaving skills training for hands on (compression only) CPR, and training to recognize the signs of a heart attack, use of an AED, and how to perform the Heimlich maneuver for choking victims.

For a complete view of the Health Course, see the Health Education Curriculum standards and benchmarks available at the District and Middle School Office.

III. **Nutrition education and promotion**

Students will receive consistent nutrition messages throughout schools, classrooms, cafeterias, and school media:

- Teachers will integrate nutrition education into core curricula;
- Nutrition promotion will include participatory activities such as contests, promotions, farm visits, and experience working in school gardens;
- The nutrition education program will be linked to school meal programs, school gardens, cafeteria nutrition promotion, after-school programs, and farm-to-school programs;
- Nutrition education will be offered in the cafeteria as well as the classroom, with coordination between the foodservice staff and teachers;
- Nutrition education will promote fruits, vegetables, whole-grain products, low-fat dairy products, healthy food preparation methods, and accurate portion sizes;
- Students will have opportunities to taste foods that are low in saturated and trans fats, sodium and added sugar;
- Staff members responsible for nutrition education will regularly participate in relevant professional development (e.g., training on the Dietary Guidelines for Americans and how to teach them);
- Staff will only use approved nutrition curriculum in the classroom. Curriculum developed by corporate interests is prohibited;
- Nutrition education will be provided to families via handouts, newsletters, postings on the web-site, presentations, and workshops. The school menu will be posted online;
- Staff is strongly encouraged to model healthful eating habits, and discouraged from eating in front of children/sharing food with children during regular class time, outside of activities related to the nutrition education curriculum. Staff is not permitted to eat or drink out of branded packaging in front of children (e.g., coffee containers with specific company logos);
- Families will be requested to pack lunches and snacks that meet district nutrition standards and will be provided with written guidance on how to accomplish this.

Specifically, the nutrition curriculum will encompass:

- Promotion of adequate nutrient intake and healthy eating practices;
- Skill development, such as reading labels to evaluate the nutrient quality of foods, meal planning, analysis of health information;
- Examination of the problems associated with food marketing to children;
- Nutrition themes including, but not limited to USDA's MY Plate, Dietary Guidelines for Americans, adequate nutrient intake (such as carbohydrates, proteins, fats), body image and food safety.

IV. **Nutrition Standards for All Food and Beverages Sold or Served on School Grounds**

A. USDA School Meals:

School meals will include a variety of healthy choices while accommodating special dietary needs and ethnic and cultural food preferences. All schools shall participate in the USDA school breakfast, school lunch and summer food programs.

In addition:

- All reimbursable meals will meet nutrition standards mandated by the USDA, as well as any additional state nutrition standards that go beyond USDA requirements;
- The school meal programs will be administered by a team that will include a dietician, business manager and qualified chef. If the district does not employ staff with all three areas of expertise, consultants will be used. All cafeteria staff will be provided training on USDA meal plans/reimbursable meals so they can properly advise students as to the meal components they may/must take, as well as cooking techniques, recipe implementation, sanitation, and food safety;
- All menus will be reviewed by a dietician when possible. When this is not feasible, sample USDA menus or USDA software for menu review may be used;
- Students will be provided at least 10 minutes to eat breakfast and 20 minutes to eat lunch after being seated;
- Meals will be served in a clean and pleasant setting and under appropriate supervision. Rules for safe behavior will be consistently enforced;
- High school campuses will be "closed" meaning that students are not permitted to leave the school grounds during the school day;
- Lunch will follow recess period and will be scheduled between 11 a.m. and 1 p.m.;

- Tutoring, club, or organizational meetings will not be scheduled during meal time, unless students may eat during such activities;
- Students will have access to hand washing/hand sanitizing facilities before meals and snacks and cafeteria staff will remind students to make use of them;
- Information on the nutritional content and ingredients of meals will be found on menus, in school newsletters and on the district web-site. Parents and students will be informed that information is available and information shall be kept up-to-date;
- Participation in school meal programs will be promoted. Parents will be notified of the availability of the breakfast, lunch and summer food programs and will be encouraged to determine eligibility for reduced or free meals. Schools will use nontraditional breakfast service to increase participation, such as breakfast served in the classroom;
- Foods served as part of the Before and Aftercare (childcare) programs run by the school must meet USDA standards if they are reimbursable under a school meals program. Otherwise they must meet the district's nutrition standards for competitive foods (see Part B). Foods served as part of the Before and Aftercare (child care) programs run by an outside organization (e.g., YMCA) must meet the district's nutrition standards for competitive foods.

B. Competitive Foods and Beverages

All foods and beverages *sold* on school grounds to students outside of reimbursable school meals are considered “competitive foods.” Competitive foods include items sold a la carte in the cafeteria, from vending machines, school stores and for in-school fundraisers. *All* competitive foods must comply with the district's nutrition standards, as well as all applicable state and federal standards. Foods *served* as part of the Before and Aftercare (child care) programs must also comply with the district's nutrition standards *unless* they are reimbursable under USDA school meals program, in which case they must comply with all applicable USDA standards.

Hatch Valley Public Schools Nutrition Standards:

The Institute of Medicine's nutrition standards for competitive foods/beverages in schools has been adopted by the district. A summary of the standards is below.

Foods

Only fruits, vegetables, nuts and seeds, whole grains, low-fat dairy and combination products may be sold, following the standards below:

- Packaged items shall not exceed one serving per package/200 calories;
- Items shall contain no more than 35% of total calories from fat, less than 10% of total calories from saturated fats and zero trans fats. Exception: The fat content of nuts and seeds will not count against the total fat content of packaged products;
- Items shall contain no more than 35% of calories from total sugars. Exception: Yogurt, may contain up to 30grams of total sugars per 8 oz serving;
- Items shall contain less than or equal to 200mg of sodium per packaged portion;
- Combination items must contain at least one serving of whole grains, fruit or vegetable, per portion as packaged, in any combination (e.g., ½ serving of fruit and ½ serving of whole grain in one portion).

A la carte items in the cafeteria must be USDA school meal components (200 calorie limit does not apply) AND meet the above fat and sugar limits. A la carte items cannot exceed 480mg of sodium.

Whole fruits, vegetables, nuts and seeds are preferable to processed food items.

Beverages

The only beverages allowed to be sold outside of school meals include:

- Low-fat (1%), non-fat or non-dairy milk in 8 oz portions (plain or flavored with no more than 22 grams of total sugars per 8 oz);
- 100% fruit/vegetable juice in 4 oz portions for elementary and middle school, and 8 oz portions for high school;
- Plain water.

Fundraising

- Non-food fundraising is promoted. When in-school fundraising involves food, items must meet the district's nutrition standards for competitive foods* and cannot be sold for immediate consumption. When out-of-school fundraising events involve food, items sold must meet the nutrition standards for a la carte items sold in the cafeteria OR the district's nutrition standards for competitive foods*.
- Fundraising activities that promote physical activity are encouraged.
- Fundraising activities will not promote branded products (for example, Domino's Dough Raising Program, branded candy sales, etc.) .

Celebrations

- Celebrations that involve food will be limited to one per month. Only foods that meet district's nutrition standards will be allowed at school celebrations;
- Parents will be made aware in advance of when a celebration with food is taking place and what is to be served;
- Non-food celebrations will be promoted and a list of ideas will be available to parents and teachers.

Access to Drinking Water

- Students and school staff members will have access to free, safe, fresh drinking water at all times throughout the school day. Water jugs and cups will be available in the cafeteria if water fountains are not present.
Supervisory staff will facilitate access to water in the cafeteria. Students will be allowed to bring drinking water from home into the classroom.
- Water will be promoted as a substitute for sugar-sweetened beverages (SSBs)
- School staff will be encouraged to model drinking water consumption.
- Maintenance will be performed on all water fountains regularly to ensure that hygiene standards for drinking fountains, water jugs, hydration stations, water jets, and other methods for delivering drinking water are maintained.

Marketing¹

School-based marketing will be consistent with nutrition education and health promotion. As such, the following guidelines apply:

- Schools will restrict food and beverage marketing to the promotion of foods and beverages that meet the nutrition standards set forth in the District Wellness Policy;

Examples of marketing techniques include the following:

- Brand names, trademarks, logos, or tags, except when placed on a physically present food or beverage product or on its container;
- Displays, such as on vending machine exteriors;
- Corporate brand, logo, name, or trademark on cups, posters, book covers, school supplies, or educational materials;
- Corporate brand, logo, name, or trademark on school equipment, message boards, scoreboards, or uniforms;

¹National Policy & Legal Analysis Network to Prevent Childhood Obesity (NPLAN). District Policy Restricting the Advertising of Food and Beverages Not Permitted to be Sold on School Grounds. Available: <http://nplan.rhine.rockriverstar.com/childhood-obesity/products/district-policy-restricting-advertising-food-beverages>

- Advertisements in school publications or school mailings;
- Sponsorship of school activities, fundraisers, or sports teams;
- Broadcasts on school radio stations or in-school television, such as Channel One;
- Educational incentive programs such as contests, or programs that provide schools with supplies or funds when families purchase specific food products;
- Free samples or coupons displaying advertising of a product.

Food used as reward or punishment

Research clearly indicates that the use of food to reward/reinforce desirable behavior and academic performance, etc. has negative, unintended consequences. The use of food as a reward and withholding food as a punishment are strictly prohibited.

V. **Physical Activity**

Physical Education

All K-12 students will receive daily physical education (150 minutes per week for elementary school students and 225 minutes per week for middle and high school students) for the entire school year. Physical Education will be standards-based, using national and state-developed standards. Physical Education classes will be sequential, building from year to year, and content will include motor skills, concepts and strategies, engagement in physical activity, physical fitness, responsible behavior and benefits of physical activity. Physical education programs will meet the needs of all students, including those who are not athletically gifted, and actively teach cooperation, fair play, and responsible participation. Students will be able to demonstrate competency through application of skills.

Student involvement in other activities, including those involving physical activity (e.g. interscholastic or intramural sports), will not be substituted for physical education.

- Physical education classes will count toward graduation and GPA;
- Teacher to student ratio will be no greater than 1:25;
- The school will provide adequate space/equipment and conform to all safety standards;
- The school prohibits the use of physical activity and withholding of physical education class and other forms of physical activity as punishment;
- All Physical Education classes will be taught by a qualified physical education teacher and at least 50% of class time will be spent in moderate to vigorous activity;
- Physical education staff will receive professional development on a yearly basis;

Physical Activity

All students will have opportunities for physical activity beyond physical education class on a daily basis. Classroom health education will reinforce the knowledge and skills needed to maintain a physically active lifestyle. Students will be encouraged to reduce sedentary time, and will not be required to engage in sedentary activities for more than two hours without an opportunity to stretch and move around. Short (3-5 minute) “energy release” physical activity breaks will be provided between classes in elementary school, for example, programs such as Take 10! And ABC for Fitness will be used to incorporate short activity breaks into the day.

Teachers will be expected to incorporate opportunities for physical activity in the classroom whenever possible and will be encouraged to serve as role models by being physically active alongside the students.

Recess

All elementary school students will have at least 20 minutes a day of supervised recess before the lunch period, during which moderate to vigorous physical activity will be encouraged. Outdoor recess will only be withheld in the event of extreme weather, as defined by the district (this may vary regionally). In the event that recess must be held indoors, teachers and staff will follow indoor recess guidelines, developed by the school’s Wellness Committee, to ensure adequate physical activity for students.

Physical Activity Programs

Elementary, middle, and high school will offer extracurricular physical activity programs, such as physical activity clubs and intramural programs. High school and middle school will offer interscholastic sports programs to all students.

VI. Healthy and Safe Environment

Safe Routes to School

The school district will assess and, if necessary and to the extent possible, make needed improvements to make it safer and easier for students to walk and bike to school.

For example, crossing guards may be stationed around the school to facilitate safe walking and biking school commutes, and bike racks will be available. The school will work together with local public works, public safety, and/or police departments in those efforts.

The Schools Safe Schools Plan will be revisited each year by the school safety committee and resubmitted to the NM PED every 3 years.

The District Bullying Prevention and Reporting Forms can be found on the Hatch Valley Public Schools Website. www.hatchschools.net. Each school level has a Prevention Program that is age appropriate. The elementary uses the Positive Behavior Intervention System (Bear Paws).

The Safe Schools Plan is kept in the office of each school and central office. This plan is shared with local law enforcement and those included in the implementation of the plan. Only parts of the plan are shared with the public, per best practices guidance.

VII. OTHER WELLNESS POLICY COMPONENTS

Students with health care needs that may affect their school attendance and or performance have individualized Health Plans, which are separated from IEPs but attached to the IEP OF a 504 Plan based on a student's needs. These documents can be found in the Special Education Department or with the 504 officer of each school

Schools are compliant with NMAC 6.12.2.10 in reference to students who may be diagnosed with HIV/AIDS. Their privacy and diagnosis is protected per School Board Policy J-5-211 which is in alignment with NMAC.

The District is in alignment with NMAC 6.12.2.8 the guidance from State Statute on immunizations and student registration. Exemptions are documented per NMAC 7.5.3

Board Policy J-5361 provides guidance on students' authorization to carry and self-administer medications, for asthma, anaphylaxis emergencies and diabetes in the school setting. The HVPS Nursing department is in compliance with mandatory vision screenings of children in grades Prek, K, 1 & 3. As well as those screenings needed for Student Assistance Team meetings.

VIII. Social and Emotional Well-Being

Hatch Valley Public Schools has an MOU with Ben Archer Clinic and the provide Social Workers, Counselors and Substance Abuse specialists for referred students.

Every Staff Member is required to complete Substance Abuse detection and reporting training, Child Abuse and Neglect detection and reporting training. The Duty to Report is included in this training.

Hatch Valley Public Schools is a Gun Free, Drug Free, Tobacco Free Zone.

Hatch Valley Public Schools Maintenance and Custodial department has MDS information for all chemicals and a procedures manual for the use and disposal of pesticides.

IX. Evaluation and Enforcement²

This wellness policy was developed by the District Wellness Committee, a group comprising individuals from the following groups: parents, teachers, students, school administration, food service director and staff, nutritionist, Board of Education, Health Services, and Health and Physical Education staff. The committee is active—meetings are held two times during the school year (minimum) to review and revise, if needed, policy content and to design and evaluate implementation plans throughout district schools.

The Committee shall also undertake additional tasks as consistent with the wellness policy guidelines issued by the USDA. All meeting dates and times will be posted on the school district's website and meetings will be open to the public.

The principal of each school will ensure compliance within the school and will report on compliance to the superintendent, who will provide a report to the school board and the wellness committee.

The superintendent has identified the coordinator as the District RN who will ensure that each school implements the policy

Policy revisions will take into account new research and evidence on health trends, new national and state standards and guidelines, new state and federal initiatives, local evaluation data, changing district priorities, and other issues.

²Information on wellness policy enforcement was provided by Karla Hampton, attorney/healthy policy consultant with Enigami Consulting Services, LLC. Ms. Hampton provides legal technical assistance on federal and state laws and local policies that shape the built environment and school food environment. She can be reached at karla@enigamiconsulting.com.

X. Staff Wellness

February 2018- SHAC meeting Update;

A Missing Component from the HVPS Wellness Policy:

“Staff wellness” means opportunities for school staff to improve their health status through activities such as health assessments, health education and health-related fitness activities. These opportunities encourage school staff to pursue a healthy lifestyle that contributes to their improved health status, improved morale, and a greater personal commitment to the school's overall coordinated school health approach.

(The spring meeting 2018 SHAC members will return with updates to this component).

For School staff to improve their health status through activities such as;

>Health assessments:

M.O.M. (Mobile Mammograms and bone density annually)

Offered each year in January mobile unit at HVMS

SBHC- all staff can go to the School Based Health Clinic at the High School

>Health education: SBHC

>Health-related fitness activities:

Volleyball & Basketball

Faculty vs Students competitions at MS & HS

Booster Club Golf Tournament
