Course Description:

Fashion Design is a one-credit course designed for students interested in fashion, fashion design, and apparel and textile design technology. Content provides opportunities for students to explore historic costumes, research current fashion styles and trends, analyze fibers and textiles, design clothing and accessories, utilize technology in fashion design, and explore career options in apparel and textiles industries.

Course Goals:

- Provide adequate and relevant instruction to produce informed, responsible, productive citizens.
- Continuously improve and upgrade the program to meet the changing needs of the industry, technology and the students themselves.
- Focus on lifelong learning and needs of all students.

Instructional Plan:

The course is broken up into 3 units. Each unit will include project based learning assignments, formative and summative assessments, and instruction that embeds literacy and math skills.

Unit 1: Apparel and Textile Industries

- Define relevant terms used within the apparel and textile industries.
- Assess the impact of national and international regulations for the apparel and fashion industries, the impact of trade associations on the apparel and textile industries
- Explain the impact of fashion cycles on current fashions and various historical influences.

Unit 2: Apparel Production

- Identify characteristics of common fabrics.
- Summarize which fabrics are best suited for various garment styles.
- Explain how to care for clothing on a routine basis.
- Choose the best method for removing specific stains from clothing.
- Describe how to store clothing and accessories effectively.

Unit 3: Design in Fashion

- Determine the fashion design process.
- Define basic color terms and describe the relationship of the colors and the color wheel.
- Identify the basic color schemes.
- Illustrate elements and principles of design to create a line of fashions.

Essential Questions:

- Why is it important for a fashion designer to know the language of fashion in order to understand fashion?
- What is the impact of design labels, trademarks of manufacturers and types of stores have on the fashion and textile industries?
- What are the classifications of apparel used in the fashion industry?
- How does an ever-changing technological society affect fashion design?
- What are the characteristics of a quality fashion design studio?
- What is the process for designing fashion?
- How does clothing care affect the lifespan of your wardrobe?

Professional Student Organization

FCCLA (Family, Career and Community Leaders of America) is the professional student organization for Family & Consumer Sciences classes. You are encouraged to join. Chapter projects focus on a variety of youth concerns, including teen pregnancy, parenting, family relationships, substance abuse, peer pressure, environment, nutrition and fitness, teen violence and career exploration. Involvement in FCCLA offers members the opportunity to expand their leadership potential and develop skills for life -- planning, goal setting, problem solving, decision making and interpersonal communication -- necessary in the home and workplace.

Class Rules and Expectations:

- Respect
 - Ms. Kimbrell
