

Lanett City Schools provide a Health Services Program to all students. The purpose of this program is to promote health and safety throughout the school system. Lanett City Schools are currently staffed by two Registered Nurses, Belinda Reed and Cathy Weldon. Nurse Reed and Nurse Weldon work together with students, parents, and teachers to maintain student health and a healthy learning environment. This is accomplished through conducting health assessments, ongoing management of chronic illnesses, providing emergency care to sick or injured students, maintaining a communicable disease program, and providing education on a multitude of relevant health-related topics.

The Health Services program conducts routine vision and hearing screenings, as well as annual dental and scoliosis screenings. An Influenza Prevention program consists of annual vaccinations that are available to all students and staff. Individualized Education Plans and Emergency Action Plans are developed for students with chronic health conditions.

Please call Nurse Reed at 334-644-5961 or Nurse Weldon at 334-644-5998 with any questions.
