

## ACCESS PROTOCOLS FOR SCHOOL BUILDINGS

APRIL 15TH, 2021

### **Plan for COVID-19 (SARS-CoV-2 and its variants) Exposure Prevention, Preparedness, and Response**

#### **PURPOSE:**

Shonto Preparatory School (hereinafter “School District”) takes the health and safety of our employees very seriously. With the spread of the coronavirus or “COVID-19,” a respiratory disease caused by the SARS-CoV-2 virus and its variants, the School District must remain vigilant in mitigating the outbreak. In order to be safe and maintain operations, we have developed this COVID-19 Exposure Prevention, Preparedness, and Response Plan to be implemented, to the extent feasible and appropriate, throughout the School District and at all of our facilities. The School District has also identified a team of employees to monitor the related guidance that the U.S. Center for Disease Control and Prevention (“CDC”) and Occupational Safety and Health Administration (“OSHA”) continue to make available.

This Plan is based on information available from the CDC and OSHA at the time of its development and is subject to change based on variant trends, further information provided by the CDC, OSHA, Navajo Nation and other local public officials. The School District may also amend this Plan based on operational needs and will serve as a minimum standard for the District.

#### **I. Responsibilities of Administration and Supervisors**

All administrators and supervisors must be familiar with this Plan and be ready to answer questions from employees. Administrators and supervisors must set a good example by following this Plan at all times. This involves practicing good personal hygiene and facility safety practices to prevent the spread of the virus.

Administrators and supervisors must encourage this same behavior from all employees.

Administrators and Supervisors will be responsible for training their employees’ on this policy/procedures. Administrators and Supervisors shall review the policy/procedures with their staff on a bi monthly basis, so long as this policy/procedure is in place.

## II. Responsibilities of Employees

The School District is asking every one of our employees to help with our prevention efforts while at work. In order to minimize the spread of COVID-19 at our facilities, everyone must play their part. As set forth below, the School District has instituted various housekeeping, social distancing, and other best practices at our facilities. All employees must follow these. In addition, employees are expected to report to their administrators or supervisors if they are experiencing signs or symptoms of COVID-19, as described below. If you have a specific question about this Plan or COVID-19, please ask your administrator or supervisor. If they cannot answer the question, please contact one of the following: Superintendent, Director of Support Services or Workforce Leader.

OSHA and the CDC have provided the following control and preventive guidance for all employees, regardless of exposure risk:

- Frequently wash your hands with soap and water for at least 20 seconds. When soap and running water are unavailable, use an alcohol-based hand rub with at least 60% alcohol and remember to wash your hands immediately once soap and water are available.
- Avoid touching your eyes, nose, or mouth with unwashed hands.
- Follow appropriate respiratory etiquette, which includes covering your mouth when coughing and sneezing. Wearing a mask when you are not able to social distance.
- Avoid close contact with people who are sick.

In addition, employees must familiarize themselves with the symptoms of COVID-19, which include the following:

- Coughing;
- Fever;
- Shortness of breath, difficulty breathing; and
- Early symptoms such as chills, body aches, sore throat, headache, diarrhea, nausea/vomiting, and runny nose.

**If you develop a fever and symptoms of respiratory illness, such as cough or shortness of breath, DO NOT GO TO WORK and call your supervisor and go to the nearest health care facility for testing right away.** Likewise, if you come into close contact with someone showing these symptoms, call your supervisor right away.

### III. Facility Protective Measures

The School District has instituted the following protective measures at all facilities.

#### A. General Safety Policies

- Any employee/contractor/visitor/vendor showing symptoms of COVID-19 will be asked to leave the facility, pending clearance from a physician.
- Staff must set appointments with the department they wish to see prior to showing up, if possible.
- Meetings will be conducted by telephone or virtual meeting platform such as zoom, gotomeeting or other similar platforms, if possible. If meetings are conducted in-person, attendance will be collected verbally, and the Supervisor / Administrator will sign-in each attendee. Attendance will not be tracked through passed-around sign-in sheets or mobile devices. During any in-person meetings, avoid gathering in groups of more than 10 people and ensure participants remain at least six (6) feet apart.
- Employees must avoid physical contact with others and shall direct others (co-workers/contractors/visitors/vendors) to increase personal space to at least six (6) feet, where possible.
- Employees will be required to stagger working hours, breaks and lunches to minimize the size of any group at any one time to less than ten (10) people in one location. Example: There shall not be more than 10 people in the facility break room at any given time.
- Building occupancy limit will be the overall amount of people allowed in one building at one time. Example: Central Building has an occupancy limit of 25 total people in the building at one time. Once the limit is reached no

more people will be allowed to enter the building until some have exited the building.

- If access to running water and soap for hand washing is not available, the School District will provide, if available, alcohol-based hand sanitizers and/or wipes.
- Employees should limit the use of other co-worker's equipment. To the extent equipment must be shared, the School District will provide supplies to clean and disinfect equipment before and after use. When cleaning equipment, consult manufacturing recommendations (Read Directions on the container) for proper cleaning techniques and restrictions.
- The School District will divide staff into multiple groups, where possible, so that work can continue effectively in the event that one of the divided teams is required to quarantine.
- As part of the division of staff, the School District may divide employees into dedicated shifts, at which point employees will remain with their dedicated shifts until further notice. If there is a legitimate reason for an employee to change shifts, the direct supervisor will have sole discretion in making that alteration.
- Employees are encouraged to minimize ride-sharing. While in vehicles, employees must ensure adequate ventilation.

## B. Campus Visitors

- The number of visitors to the campus, including offices, classrooms and any buildings, will be limited to only those necessary for the work to be performed.
- **All visitors** shall schedule an appointment with the appropriate department and will be screened at each building entry point. If the visitor answers "yes" to any of the following questions, he/she will not be permitted to access the building:
  - Have you been in close contact with someone who has tested positive for the COVID-19 or that has been sick in the last 14 days?

If a "yes" answer is received, an explanation of the "yes" response will be required.

- ❑ Are you currently experiencing any of the following symptoms within the past 14 days such as:
  - Coughing
  - Fever
  - Shortness of Breath
  - Body Aches

If a “yes” answer is received, an explanation of the “yes” response will be required.

- ❑ Have you traveled to any location off the Navajo Reservation that is actively known as a “Hot Spot”?

If a “yes” answer is received, an explanation of the “yes” response will be required.

- ❑ Screener will take the visitors temperature, on the forehead, and record it on form.

- Deliveries will be permitted but should be properly coordinated in line with the employer’s minimal contact and cleaning protocols. Delivery personnel should remain in their vehicles if at all possible.

### C. Personal Protective Equipment and Work Practice Controls

- In addition to regular PPE for workers engaged in various tasks (fall protection, sanitation practice, social distancing), the School District will also provide:

- ❑ Nitrile Gloves: The use of gloves is optional for all employees. Gloves may be worn while working, unless the use of gloves will cause further hazard to the employee.
- ❑ Eye protection: The use of eye protection / face shield is optional for all employees. Eye protection/face shields can be worn during close contact with students/staff. Ex: taking temperature of the student/staff, one to one tutoring, applying first aid.
- ❑ NOTE: The CDC is currently not recommending that healthy people wear N95 respirators to prevent the spread of COVID-19. Nevertheless, employees must wear a face mask or a disposable face mask, properly, if required by the School District and if available.

- ❑ Institute a rigorous housekeeping program to reduce potential exposure while at work.

#### **IV. Facility Cleaning and Disinfecting**

The School District has instituted regular housekeeping practices, which include cleaning and disinfecting frequently used equipment, and other elements of the work environment, where possible. **Employees should regularly do the same in their assigned work areas.**

- When collecting trash, proper PPE must be worn such as nitrile, latex, or vinyl gloves.
- The School District will ensure that hand sanitizer dispensers are always filled. Frequently touched items will be disinfected frequently.
- Equipment/workstations should be cleaned at least once per day and before change in operator.
- OSHA has indicated that a reliable report that an employee who has tested positive for COVID-19 does not typically require the employer to perform special cleaning or decontamination of work environments, unless those environments are visibly contaminated with blood or other bodily fluids. Notwithstanding this, the School District will clean those areas of the facility that a confirmed-positive individual may have contacted and it will do so before employees can access that work space again.
- The School District will ensure that any disinfection shall be conducted using one of the following:
  - ❑ Common EPA-registered household disinfectant;
  - ❑ Alcohol solution with at least 60% alcohol; or
  - ❑ Diluted household bleach solutions (if appropriate for the surface).
  - ❑ Commercial strength disinfectant (Electrostatic Sprayers)
- The School District will maintain Safety Data Sheets of all disinfectants used on site.

<https://www.osha.gov/SLTC/covid-19/controlprevention.html>

## V. Campus Exposure Situations

- Employee who **Exhibits** COVID-19 Symptoms

If an employee exhibits COVID-19 symptoms, the employee must remain at home until he or she is symptom free for 72 hours (3 full days) without the use of fever-reducing or other symptom-altering medicines (e.g., cough suppressants). The School District will similarly require an employee who reports to work with symptoms to return home until he or she is symptom free for 72 hours (3 full days). The School District may require the employee to report to the nearest health care facility for testing. To the extent practical, employees are required to obtain a doctor's note clearing them to return to work.

- Employee who **Tests Positive** for COVID-19

An employee who tests positive for COVID-19 will be directed to self-quarantine away from work. Employees that test positive and are symptom free may return to work when at least seven (7) days have passed since the date of his or her first positive test, and have not had a subsequent illness. To the extent practical, employees are required to obtain a doctor's note clearing them to return to work.

Employees who test positive and are directed to care for themselves at home may return to work when: (1) at least 7 days have passed since recovery; (2) at least seven (7) days have passed since symptoms first appeared. To the extent practical, employees are required to obtain a doctor's note clearing them to return to work.

Employees who test positive and have been hospitalized may return to work when directed to do so by their medical care providers. The School District will require an employee to provide documentation clearing his or her return to work.

- Employee who has had **Close Contact with an Individual Who Has Tested Positive for COVID-19:**

Employees who have come into close contact with an individual who has tested positive for COVID-19 (co-worker or otherwise) will be directed to self-quarantine

for 7 days from the last date of close contact with that individual. Close contact is defined as less than six (6) feet for a prolonged period of time (more than 15 consecutive minutes according to CDC guidelines).

If the School District learns that an employee has tested positive, the School District will conduct an investigation to determine co-workers who may have had close contact with the confirmed- positive employee in the prior 14 days and direct those individuals who have had close contact with the confirmed-positive employee to self-quarantine for 7 days from the last date of close contact with that employee. If applicable, the School District will also notify any sub-contractors, vendors/suppliers or visitors who may have had close contact with the confirmed-positive employee. If an employee learns that he or she has come into close contact with a confirmed-positive individual outside of the workplace, he/she must alert an administrator or supervisor of the close contact and self-quarantine for 7 days from the last date of close contact with that individual.

## **VI. OSHA Recordkeeping**

If a confirmed case of COVID-19 is reported, the School District will determine if it meets the criteria for recordability and reportability under OSHA's recordkeeping rule. OSHA requires employers to record work-related injuries and illnesses that meet certain severity criteria on the OSHA 300 Log, as well as complete the OSHA Form 301 (or equivalent) upon the occurrence of these injuries. For purposes of COVID-19, OSHA also requires employers to report to OSHA any work-related illness that (1) results in a fatality, or (2) results in the in-patient hospitalization of one or more employees. "In-patient" hospitalization is defined as a formal admission to the in-patient service of a hospital or clinic for care or treatment.

If an employee has a confirmed case of COVID-19, the School District will assess any workplace exposures to determine if the case is work-related. Work-relatedness is presumed for illnesses that result from events or exposures in the work environment, unless it meets certain exceptions. One of those exceptions is that the illness involves signs or symptoms that surface at work but result solely from a non-work-related event or exposure that occurs outside of the work environment. Thus, if an employee develops COVID-19 solely from an exposure outside of the work environment, it would not be work-related, and thus not recordable.

OSHA has decided that COVID-19 should not be excluded from coverage of the rule – like the common cold or the seasonal flu – and, thus, OSHA is considering it an "illness." However, OSHA has stated that only confirmed cases of COVID-19 should be considered an illness under the rule. Thus, **if an employee simply comes**

**to work with symptoms consistent with COVID-19 but is not a confirmed diagnosis, the recordability analysis is not necessarily triggered at that time.**

The School Districts assessment will consider the work environment itself, the type of work performed, the risk of person-to-person transmission given the work environment, and other factors such as community spread. Further, if an employee has a confirmed case of COVID-19 that is considered work-related, the School District will report the case to OSHA if it results in a fatality within 30 days or an in-patient hospitalization within 24-hours of the exposure incident.

OSHA records will be kept in a secure location in the Districts Human Resource Department.

## VII. Confidentiality/Privacy

Except for circumstances in which the School District is legally required to report workplace occurrences of communicable disease, the confidentiality of all medical conditions will be maintained in accordance with applicable law and to the extent practical under the circumstances. When it is required, the number of persons who will be informed that an unnamed employee has tested positive will be kept to the minimum needed to comply with reporting requirements and to limit the potential for transmission to others. The School District reserves the right to inform other employees that an unnamed co-worker has been diagnosed with COVID-19 if the other employees might have been exposed to the disease so the employees may take measures to protect their own health. The School District also reserves the right to inform sub-contractors, vendors/suppliers or visitors that an unnamed employee has been diagnosed with COVID-19 if they might have been exposed to the disease so those individuals may take measures to protect their own health.

## **VIII. General Questions**

Given the fast-developing nature of the COVID-19 outbreak, the School District may modify this Plan on a case by case basis. If you have any questions concerning this Plan, please contact one of the following: Superintendent, Director of Support Services or Workforce Leader.

## **COVID-19 Checklist for Employers and Employees**

Take time to become familiarize yourself with the Symptoms of COVID-19:

- Coughing, fever, shortness of breath, and difficulty breathing.
- Early symptoms may include chills, body aches, sore throat, headache, diarrhea, nausea/vomiting, and runny nose.

A list of symptoms can be found at [https://www.cdc.gov/coronavirus/2019-ncov/symptomsesting/symptoms.html?CDC\\_AA\\_refVal=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fabout%2Fsymptoms.html](https://www.cdc.gov/coronavirus/2019-ncov/symptomsesting/symptoms.html?CDC_AA_refVal=https%3A%2F%2Fwww.cdc.gov%2Fcoronavirus%2F2019-ncov%2Fabout%2Fsymptoms.html)

If you develop a fever and symptoms of respiratory illness, **DO NOT GO TO WORK** and call your supervisor and health-care provider immediately. Do the same thing if you come into close contact with someone showing these symptoms.

### **Employer Responsibilities**

- Develop a COVID-19 Exposure Action Plan.
- Conduct safety meetings by phone or virtual meeting platforms (zoom, gotomeeting, etc.) if possible. If not, instruct employees to maintain 6-feet between each other. The supervisor will track attendance verbally rather than having employees sign an attendance sheet.

Employer will be required to stagger working hours, breaks and lunches (if applicable to that department) to minimize the size of any group at any one time to less than ten (10) people in one location. Example: There shall not be more than 10 people in the facility break room at any given time.

Employer will determine building occupancy limits and shall post those limits throughout the building. Building occupancy limit will be the over amount of people allowed in one building at one time. Example: Central Building has an occupancy limit of 25 total people in the building at one time. Once the limit is reached no more people will be allowed to enter the building until some have exited the building.

Central- 25

Elementary building- 35

High School-20

Cafeteria- 18

Residential 674 -5

Residential 678- 5

Warehouse- 5

Other buildings- \_\_\_\_

Employer will provide, if available, alcohol-based hand sanitizers and/or wipes.

Employer should limit the use of other co-worker's equipment. To the extent equipment must be shared, the School District will provide sanitation supplies to clean equipment before and after use. When cleaning equipment, consult manufacturing recommendations (Read Directions on the container) for proper cleaning techniques and restrictions.

Employer will divide staff into multiple groups where possible so that work can continue effectively in the event that one of the divided teams is required to quarantine.

As part of the division of staff, the School District will divide employees into dedicated shifts, at which point employees will remain with their dedicated shifts until further notice. If there is a legitimate reason for an employee to change shifts, the School District will have sole discretion in making that alteration.

Employer will encourage minimization of ride-sharing. While in vehicles, employees must ensure adequate ventilation.

Employer will screen all visitors to ensure they are not exhibiting symptoms.

Employer may ask all employees, contractors, and visitors to leave the jobsite and return home if they are showing symptoms.

Provide protective equipment (PPE) to any employees assigned cleaning/disinfecting tasks.

### **Employee Responsibilities**

- Become familiar with the Exposure Action Plan and follow all elements of the Plan.
- Practice good hygiene:

Wash hands with soap and water for at least 20 seconds. If these are not available, use alcohol-based hand rub with at least 60% alcohol. Avoid touching your face, eyes, food, etc. with unwashed hands.

- Employees must avoid physical contact with others and shall direct others (co-workers/contractors/visitors/vendors) to increase personal space to at least six (6) feet, where possible.
- Employees will be required to stagger working hours, breaks and lunches to minimize the size of any group at any one time to less than ten (10) people in one location. Example: There shall not be more than 10 people in the facility break room at any given time.
- Employees should limit the use of other co-worker's equipment. To the extent equipment must be shared, the School District will provide sanitation supplies to clean equipment before and after use. When cleaning equipment, consult manufacturing recommendations (Read Directions on the container) for proper cleaning techniques and restrictions.
- Employees are encouraged to minimize ride-sharing. While in vehicles, employees must ensure adequate ventilation.

### **Cleaning/Disinfecting Facilities and Other Protective Measures**

- Clean and disinfect frequently used tools and equipment on a regular basis. This includes other elements of the facility where possible. Employees should regularly do the same in their assigned work areas.
- Disinfect shared surfaces (door handles, equipment controls, etc.) on a regular basis.
- Avoid sharing tools with co-workers. If not, disinfect before and after each use.
- Trash collected from the jobsite must be changed frequently by someone wearing gloves.

### **Personal Protective Equipment and Alternate Work Practice Controls**

- Provide and wear the proper PPE.
- Sanitize your work area on a regular basis.

### **COVID-19 Toolbox Talk**

What is COVID-19?

The novel coronavirus, COVID-19 is one of seven types of known human coronaviruses. COVID-19, like the MERS and SARS coronaviruses, likely evolved from a virus previously found in animals. The remaining known coronaviruses cause a significant percentage of colds in adults and children, and these are not a serious threat for otherwise healthy adults.

Patients with confirmed COVID-19 infection have reportedly had mild to severe respiratory illness with symptoms such as fever, cough, and shortness of breath.

According to the U.S. Department of Health and Human Services/Centers for Disease Control and Prevention (“CDC”), Chinese authorities identified an outbreak caused by a novel—or new—coronavirus. The virus can cause mild to severe respiratory illness. The outbreak began in Wuhan, Hubei Province, China, and has spread to a growing number of other countries—including the United States.

How is COVID-19 Spread?

COVID-19, like other viruses, can spread between people. Infected people can spread COVID-19 through their respiratory secretions, especially when they cough or sneeze. According to the CDC, spread from person-to-person is most likely among close contacts (about 6 feet). Person-to-person spread is thought to occur mainly via respiratory droplets produced when an infected person coughs or sneezes, like influenza and other respiratory pathogens. These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs. It is currently unclear if a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes.

In assessing potential hazards, employers should consider whether their workers may encounter someone infected with COVID-19 in the course of their duties. Employers should also determine if workers could be exposed to environments (e.g., worksites) or materials (e.g., laboratory samples, waste) contaminated with the virus.

Depending on the work setting, employers may also rely on identification of sick individuals who have signs, symptoms, and/or a history of travel to COVID-19-affected areas that indicate potential infection with the virus, in order to help identify exposure risks for workers and implement appropriate control measures.

There is much more to learn about the transmissibility, severity, and other features associated with COVID-19, and investigations are ongoing.

## **COVID-19 Prevention and Work Practice Controls:**

### Worker Responsibilities

- Frequently wash your hands with soap and water for at least 20 seconds. When soap and running water are unavailable, use an alcohol-based hand rub with at least 60% alcohol. Always wash hands that are visibly soiled.
- Cover your mouth and nose with a tissue when you cough or sneeze or use the inside of your elbow.
- Avoid touching your eyes, nose, or mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Employees who have symptoms (i.e., fever, cough, or shortness of breath) should notify their supervisor and stay home—**DO NOT GO TO WORK.**
- Sick employees should follow CDC-recommended steps. Employees should not return to work until the criteria to discontinue home isolation are met, in consultation with healthcare providers and state and local health departments.

### **General Facility / Office Practices**

- Clean AND disinfect frequently touched objects and surfaces such as workstations, keyboards, telephones, handrails, and doorknobs. Dirty surfaces can be cleaned with soap and water prior to disinfection. To disinfect, use products that meet EPA's criteria for use against SARS-CoV-2, the cause of COVID-19, and are appropriate for the surface.
- Avoid using other employees' phones, desks, offices, or other work tools and equipment, when possible. If necessary, clean and disinfect them before and after use.
- Clean and disinfect frequently used tools and equipment on a regular basis. This includes other elements of the jobsite where possible. Employees should regularly do the same in their assigned work areas.
- Clean shared spaces such as break/lunchrooms at least once per day.
- Disinfect shared surfaces (door handles, machinery controls, etc.) on a regular basis.
- Avoid sharing tools with co-workers if it can be avoided. If not, disinfect before and after each use.
- Any trash collected from the facility must be changed frequently by someone wearing gloves.
- In addition to regular PPE for workers engaged in various tasks (fall protection, hard hats, hearing protection), employers will also provide:

Gloves: The use of gloves is optional for all employees. Gloves may be worn while working, unless the use of gloves will cause further hazard to the employee. The type of glove worn should be appropriate to the task. Employees shall avoid sharing gloves.

Eye protection: The use of eye protection / face shield is optional for all employees. Eye protection/face shields can be worn during close contact with students/staff. Ex: taking temperature of the student/staff, one to one tutoring, applying first aid.

Following is a list of PPE supplies the District will need to continually monitor and purchase.

1. Face shields
2. Touchless thermometers
3. Alcohol wipes
4. Liquid and gel hand sanitizers
5. Face Masks
6. Sprayers
7. Floor marking tape
8. Body suits and gowns
9. Tape for marking social distancing

These protocols may be amended as needed in response to rapidly changing circumstances related to COVID-19 infection.

**Building entry protocol must be put into place in every school building and work area to protect employees, visitors, and those in the care and custody of the School District. ALL individuals entering ALL School operated buildings and work areas must be ASKED the Screening Questions.**

The Screening Questionnaire script **must** be followed. The Screening Questionnaire should **NOT** be handed to individuals to complete. The questions must be asked and the screener must attempt to maintain a distance of 6 feet while asking the questions. See attached.

### **Access to School Office Buildings**

- Entry screening staff **MUST** be present at all entrances.

- Access will be controlled.
- Prior to entry all individuals (staff, visitors, vendors, contractors, etc.) must be ASKED the screening questions by entry screening staff.
- All Students, staff and visitors shall have their temperature taken on the forehead (according to manufacturer's recommendation on proper use) at the entry point.
- Individuals who answer **YES** to any question on the Screening Questionnaire must provide an explanation to the screener. The explanation will be entered into the screening form and will be used to determine if the individual will be allowed entry. Screeners can consult with an administrator of a staff who is entering the building. Administrator of the building may allow the staff member in based on the explanation received for the yes answer.
  - **Example:** Have you traveled to any location off the Navajo Reservation that is actively known as a “Hot Spot”?
  - Employee response: Yes
  - Employee provides explanation: Had medical appointment in Phoenix, Az.
- Individuals refusing to participate in the screening process **must** be denied access to the facility.
- Refusal by an employee to answer screening questions may result in the employee being placed on unauthorized leave without pay and may result in the imposition of disciplinary action.
- If a staff walks by the checkpoint because no one is there to check them in, they will be asked to come back to the checkpoint to complete the process.

## SCREENING QUESTIONNAIRE FOR SCHOOL OPERATED BUILDINGS

For infection control purposes, I need to ask you a few questions:	
<p>Are you currently experiencing any of the following symptoms within the past 14 days such as:</p> <ul style="list-style-type: none"> <li>● Fever (either subjective, or measured) or chills?</li> <li>● Cough?</li> <li>● Shortness of breath or difficulty breathing?</li> <li>● Fatigue?</li> <li>● Muscle or body aches?</li> <li>● Unusual headache?</li> <li>● New loss of taste or smell?</li> <li>● Sore throat?</li> <li>● Congestion or runny nose?</li> <li>● Nausea or vomiting?</li> <li>● Diarrhea?</li> </ul> <p>If a “yes” answer is received, an explanation of the “yes” response will be required.</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No
<p>Have you been in close contact with someone who has tested positive for the COVID-19 or that has been sick in the last 14 days?</p> <p>If a “yes” answer is received, an explanation of the “yes” response will be required.</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No
<p>Have you traveled to any location off the Navajo Reservation that is actively known as a “Hot Spot”?</p> <p>If a “yes” answer is received, an explanation of the “yes” response will be required.</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No
<p><b>Temperature of individual</b></p>	<p>°</p>

An individual who refuses to participate in the screening process **will** be denied access to the Building or worksite.
