

7th Grade Math Quarter 3 Syllabus

OVERVIEW

This mathematics course will use the I-Ready Math material to progress through the state standards for seventh grade mathematics. Due to the nature of the course, eighth grade standards and advanced concepts will be introduced by the beginning of the second quarter. Our goal is to provide students with the knowledge and tools needed to succeed not only in the course, but also as they continue their educational journey.

Grading

- Major Grades (Tests/Projects) - 60%
- Minor Grades (Quizzes/In-class assignments) - 30%
- Homework - 10%

Re-Teach/Re-Test

Students will be given ONE opportunity to retest a major grade below 60%. The grade entered in the gradebook will be the higher of the two grades, but the student will lose the opportunity to re-take any other assignments.

Absences

Students that miss work in class will have the amount of days that they missed plus one to make-up any assignments. If an assignment was assigned when a student was present and comes due while they are absent, that assignment is due on the day of their return.

Ms. Hill phill@mcpss.com

All students must join Remind! Students will receive notifications about homework, classwork assignments, and important dates.
