New Milford's Mission Statement

The mission of the New Milford Public Schools, a collaborative partnership of students, educators, family and community, is to prepare each and every student to compete and excel in an ever-changing world, embrace challenges with vigor, respect and appreciate the worth of every human being, and contribute to society by providing effective instruction and dynamic curriculum, offering a wide range of valuable experiences, and inspiring students to pursue their dreams and aspirations.

Course Title

Library Media Curriculum

Grade Levels

K-2, 3-5, 6-8, 9-12

A brief description of the course..

The NMPS Library Curriculum focuses on the Shared Foundations and Key Commitments of the National School Library Standards, newly written in 2018, put forth by the American Association of School Librarians. The 6 Standards Frameworks consist of I. Inquire, II. Include, III. Collaborate, IV. Curate, V. Explore, and VI. Engage. Four domains within the 6 Shared Foundations move students through levels of A. Think, B. Create, C. Share, and D. Grow. The NMPS Library Curriculum is structured via these 6 Shared Foundations and 4 Domains. Rather than teaching units, the 6 standards are used as our basis for curriculum. Our K-12 curriculum and the lessons taught, depending upon grade level, can encompass just one of the shared foundations, as might be the case with the K-2 levels, or most/all of the shared foundations within a lesson, as might be the case with a higher level 9-12 class. Grades 3-5 and 6-8 fall in between and build on increasingly used library skills. As support to classroom teachers, the 6-12 lessons may dovetail using a classroom teacher's content, assignment, and assessment through which we scaffold library skills. Library skills in the K-12 curriculum are taught through the lens of classroom content and not in isolation.*

Unit 1 - Inquire - Stage 1 Desired Results

ESTABLISHED GOALS

AASL I: INQUIRE
 Build new knowledge by inquiring, thinking critically, identifying problems, and developing strategies for solving problems.

Transfer

Students will be able to independently use their learning to display curiosity and initiative, engage with new knowledge, adapt, communicate and exchange learning products and participate through an ongoing inquiry-based process.

Meaning

UNDERSTANDINGS

Students will understand that...

- formulating questions through curiosity about an interest or topic and recalling prior knowledge contributes to new meaning.
- using evidence to devise and implement a plan fills knowledge gaps and generates products that illustrate learning.
- sharing products with an authentic audience, providing feedback, and then acting on the feedback will improve shared product.
- continually seeking knowledge, enacts new understanding through real-world connections, and uses reflection to guide informed decisions.

ESSENTIAL QUESTIONS

Students will keep considering...

- How does what you already know lead to more questions? How does questioning help you to learn?
- What role does evidence play in your overall plan?
- Why is constructive feedback so important when presenting to an authentic audience?
- How does new understanding of real world situations guide your learning? Why is sustained inquiry so important?

Acquisition

Students will know...

- New learning occurs when following an inquiry process.
- Background knowledge is essential to all new learning.
- How to continually question

Students will be skilled at...

- Questioning
- Recall
- Using evidence
- Planning
- Generating and sharing products
