ADDENDUM 1

Questions regarding IT20.13.01.7 – Website Content Management System & Web Hosting Services

1. The solution will provide dedicated email notification servers.
Are you specifically requesting that the provider offer email accounts for all users?

A. No. The district has it's own dedicated email server.

2. The solution will provide open database architecture for ease of integration with other district applications.
What specific applications must be integrated?

A . Currently we are using Active Directory, but may have other applications in the future. The solution should be an open solution that allows integrations.

3. The solution should provide an image library with copyright-free graphics.

Is this a must-have? Best results/practices is to use Google Images with free licensing.

A. We are aware that images can be obtained from other sources, but a gallery of stock images from the provider would be preferred.

4. Must support "Banner" (Carousel) announcements on individual pages.
Could you please provide a specific example. Most Carousel banners are not ADA compliant.

A. You can see an example at our current website: http://www.hcboe.net
(see picture below of section)

5. The solution will provide an integrated message center accessible to all users. Is this referring to internal staff to staff messaging feature?

A. This is referring to internal staff.
