# SAT Suite of Assessments Overview

The SAT® Suite of Assessments measure a student's college and career readiness from grades eight through 12.

Together, these assessments provide a comprehensive solution that systematically and progressively measures the knowledge, skills, and understandings that are essential for success in college and career.

The tests reflect the kinds of meaningful, engaging, and challenging work that students find in the best middle and high school courses taught today, creating and sustaining a durable bond between assessment and instruction.

# College and Career Readiness Benchmarks

Working together, the tests in the SAT® Suite of Assessments provide college and career readiness benchmarks and consistent feedback for measuring student progress.

- ▶ Benchmarks indicating college and career readiness are determined using SAT Suite data and first-year college performance data.
- ▶ The benchmark indicates that students who earn that score or higher have a 75% likelihood of earning a C or better in a first-year, credit-bearing course in the same subject area.
  - ▶ The PSAT™ 8/9 will provide benchmarks and norms for both 8th and 9th grades.
  - ▶ PSAT™ 10 will provide benchmarks and norms for 10th grade.
  - ▶ The PSAT/NMSQT® will provide benchmarks and norms for 10th- and 11th-graders.

# Vertical Score Scale

Total scores, section scores, test scores, and cross-test scores are vertically scaled.

- ▶ Improved scores demonstrate growth from assessment to assessment.
- ▶ Vertical scaling allows educators to monitor growth across grades.

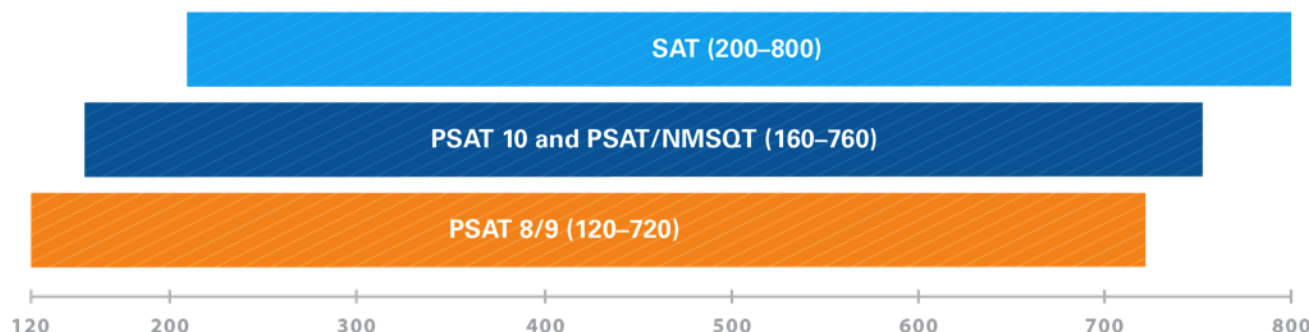

Subscores are not vertically scaled.

- ▶ Subscores provide information allowing students to pinpoint areas for improvement.
- ▶ Improved scores do not demonstrate growth from assessment to assessment at the subscore level.

*Information on Vertical Score Scales for the SAT Suite of Assessments can be found at:*  
<https://collegereadiness.collegeboard.org/>

# Vertical Growth Scale Monitoring

- ▶ **Section Scores** will be placed on a vertical scale.

- ▶ This same concept will hold true for the **Test** and **Cross-Test Scores** as well as **Total Score**.
