Planning Your Future for Sophomores

A free guide to planning and paying for higher education

Compiled and printed by the Alabama Student Loan Program-KHEAA in cooperation with the Alabama Association of Student Financial Aid Administrators (AASFAA)

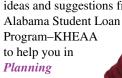

Getting Set

Congratulations. You're not a freshman anymore. It's time to look back on what you accomplished during your first year in high school and prepare for the next three — and beyond. No, it's **not** too early to think about what you're going to do after high school.

Do you know that some students decide against going to college or technical school because of the cost? Other students give up the college of their dreams and settle for their second-choice school —all because of money. The truth is, if you get all the financial aid you qualify for, you might be able to pay the same amount at a high-priced college that you would at a less expensive school.

This brochure will answer many of your questions about financial aid...but preparing for college isn't just about money. What classes should you take in high school? What sports should you play? What clubs and organizations should you join? Should you get a part-time job? All these choices

will affect your higher education and career options. Inside are some

Below are 62 Alabama colleges and technical schools that offer everything from aerospace engineering to air conditioning repair. Also listed is the county where the main campus is located. Programs vary from several months to a few years.

What You Can Do Mill

Money isn't the only thing you'll need to be ready for college. Here are some suggestions to help you make plans, set goals, and prepare for your future right now.

- Develop good study hobits. Participate
 in class, ask questions, take notes, complete
 assignments on time, and find a good study area
 at home—one that's far, far away from the TV.
 The higher your GPA, the better your chances of
 getting into the college of your choice.
- Get involved in extracurricular activities. Make a list of school and community activities that you've participated in. And don't forget to list your volunteer and work experiences. Will the extracurricular portion of your college application look a little empty? Then join a club! Volunteer to work with the elderly! Do something to broaden your horizons (and impress the college admissions officers).
- Visit www.AlabamaMentor.org. This
 website gives step-by-step instructions on
 what classes to take each year of high school
 to prepare for college. AlabamaMentor.org is
 your one-stop college planning site! It lets you
 explore Alabama's colleges, guides you through
 the admissions process and much more.

- Talk with your couns∈lor about taking important tests. Two tests many sophomores take are the PLAN and the Preliminary Scholastic Assessment Test/National Merit Scholarship Qualifying Test (PSAT/NMSQT). The PLAN is a practice test for the ACT. The PSAT/NMSQT is a practice test for the SAT, and your score could qualify you for a National Merit Scholarship, the National Achievement Scholarship for Outstanding Negro Students or the National Scholarship Service and Fund for Negro Students.
- Explore coreers that interest you. Talk with somebody who works in the profession you're interested in. Go online and research this career at AlabamaMentor.org (click on "Career Center"). Pay close attention to job duties and responsibilities, entry-level salaries, opportunities for advancement, and education/training requirements. Would you have to move away from your family and friends to find work in this career? Find out!
- Explore your higher education options. Which schools can give you the education you need for your chosen career? Will you need a two-year school or a four-year school? Log on to AlabamaMentor.org and use the "Matching Assistant" to find out which Alabama colleges offer the major you want.

Learn about

Financial Aid

Many different types of financial aid are available to students. So don't rule out your favorite college just because you think it costs too much. And don't assume that you won't qualify for financial aid. First, you **apply for student aid** to find out what kind of assistance you're eligible for. Then, you **choose the program** or programs that best suit your needs.

Test your financial aid knowledge by matching the program to its correct definition.

Higher Education—it's for EVERYBODY!

Some students think they don't need to go to college or get technical training. Lots more believe they just can't afford it.

For almost all of us, this just isn't true.

If you catch yourself saying or thinking any of the following, read on...and learn the truth.

Fiction

I can't afford to go to college or technical school.

Fact

There are literally *thousands* of sources of student financial aid available to help eligible students. Cost shouldn't stop you from planning your higher education.

Fiction

I don't need to go to college—I just want to get a job and make a lot of money.

Fact

A person with a bachelor's degree makes an average of \$17,751 **more** each year than someone who just has a high school diploma. (*That's a real statistic. Look it up.*) So over a 30-year period, you would earn \$532,530 more than your high school friends who didn't go to college.

Higher education gives you greater knowledge and increased skills...which mean more job opportunities...which mean more money...and you *know* what more money means—a better way of life for you!

Fiction

I don't need to go to college or technical school because no one else in my family has ever gone.

Fact

You feel like you won't fit in, right? But many of today's college students are the first in their family to pursue a higher education. In addition to the economic rewards, you'll gain a sense of pride and accomplishment in achieving your goals—setting a new standard the rest of your family can follow.

Fiction

My grades aren't good enough to get into college.

Fact

Grade point average and class rank are important, but other factors are also considered on college admission applications. Admissions officers look for students who have chosen challenging courses in science, math, and English. They also consider SAT/ACT test scores, letters of recommendation, involvement in school activities, volunteer service, and part-time or summer jobs.

Fiction

A higher education automatically means four or more years of college.

Fact

Many Alabama schools offer two-year degree programs. Some programs last only 18 months. With programs ranging from a few months to several years, you can find the one that is right for you.

CHOOSING a career

Some people grow up knowing exactly what they want to do for a living. That's great for them, but...

For most of us, choosing a career isn't that easy. Start with your interests. Log on to www.AlabamaMentor.org and click on "Career Center" to complete a self-assessment survey. This survey will identify careers that match your interests, abilities and skills. You can also:

- Research possible majors in *The College Board Guide to 150 Popular College Majors* published by The College Board. You should check your public library for this and other reference books. If they aren't available, ask the librarian about an interlibrary loan.
- Check the "Help Wanted" section of newspapers to see what kinds of jobs and careers are available in your area.
- ➤ Visit the College Board website at www.collegeboard.com/html/ careerbrowser.html to see detailed descriptions of 280 occupations. Details include average salaries, working conditions and required training/ education.
 - Read the *Dictionary of Occupational Titles* and the *Occupational Outlook Handbook*, both published by the U.S. Department of Labor, at your public library. You can find the *Dictionary of Occupational Titles* on the Internet at www.oalj.dol.gov/libdot.htm and the *Occupational Outlook Handbook* at www.bls.gov/oco/.

Other Services
